Scott and Elizabeth,
Thank you for sharing your home expansion plans.
They look great!
We have no objection to them.
Best,
Terrell and April Dickey

April and Terrell,

As I mentioned yesterday, we have plans to build a two-story addition onto the back of our house. An image of the proposed addition is below. We hope to break ground within weeks of obtaining a setback variance from Metro Zoning.

In regards to the setback variance – your written approval of the building plan would help us expedite the process.

As you will see in the attached Site Plan, our house already encroaches over the threshold by about 3" at the front NW corner, and an inch or so more at the back. The addition will continue along the existing house line, resulting in a 6" encroachment at the rear NE corner.

We have gone to great lengths to ensure this will be an aesthetically pleasing project. We hired Tim Winters to design the addition, and Wilkinson Builders will be performing the construction work. The City of Rolling Fields has approved (attached). **If you could please review and confirm your approval by way of a response to this email, it would be greatly appreciated.**

Feel free to respond or call me (502-609-6881) if you have any questions or concerns. Thanks in advance.

Hello Scott and Elizabeth,

Thanks for sending the plans for your addition- the elevations look great and I'm sure you will be happy to have the additional space. Can't wait to see the new interior as well.

We are in full agreement that the proposed setback variance will not in any way negatively affect the value of our property. We have no objection to this project proceeding as planned.

Scott,

Thanks for sending the plans. It all looks very nice.

Based on what you have told us, we're fine with the variance. It's just a few inches and won't affect anything.

Best,

Looks like a nice upgrade Scott. Gina and I approve the variance request.
