Methodology and Notes

Data collected for this report were taken from many sources, including local data and data found in the American Community Survey (ACS). Due to the nature of this data, some numbers may not match each other exactly, especially when comparing total populations across different topics. This is the result of differences in various methodologies used by different agencies, and Margins of Error (MOE) associated with different reports.

This report uses LOJIC Urban Neighborhood boundaries, which encompasses the summary area from U.S. Census Tracts

The Community Ministries Areas shares U.S. Census Tract boundaries with other areas. As such, please use caution when comparing raw numbers, especially across different pages of this report.
