

Planning Commission

Staff Report

January 6, 2022

Case No:	21-ZONE-0127
Project Name:	Flats of Bardstown
Location:	2100/2044 Buechel Bank Rd and 4134 R Bardstown Rd
Owner(s):	Hook Family Land LLC
Applicant:	The Marion Group
Jurisdiction:	Louisville Metro
Council District:	2-Barbara Shanklin
Case Manager:	Julia Williams, AICP, Planning Supervisor

REQUEST(S)

- Change in zoning from R-4 to R-6
- Detailed District Development plan with binding elements

CASE SUMMARY/BACKGROUND

The proposal is for 144 multi-family dwelling units on 8.85 acres for a density of 16.27 DU/AC. R-6 permits a density of 17.28 DU/AC. Access to the development is from Buechel Bank Road. 6 buildings are proposed with 152 parking spaces. The three existing lots will be consolidated into one lot. Recreational open space requirements are met with the clubhouse and playground area.

STAFF FINDING

Staff finds that the proposal meets the guidelines of the Comprehensive Plan and requirements of the Land Development Code. The proposal is located near an existing activity center, has pedestrian connectivity to the activity center as well as transits, and supports aging in place.

TECHNICAL REVIEW

The proposal has received preliminary approval from MSD. Transportation Planning has preliminarily approved the relocation of the entrance as discussed at LD&T on 12/9/21.

INTERESTED PARTY COMMENTS

See attached citizen letter.

STANDARD OF REVIEW FOR REZONING

Criteria for granting the proposed form district change/rezoning: *KRS Chapter 100.213*

1. The proposed form district/rezoning change complies with the applicable guidelines and policies Plan 2040; OR
2. The existing form district/zoning classification is inappropriate and the proposed classification is appropriate; OR

3. There have been major changes of an economic, physical, or social nature within the area involved which were not anticipated in Plan 2040 which have substantially altered the basic character of the area.

STAFF ANALYSIS FOR CHANGE IN ZONING

Following is staff's analysis of the proposed rezoning against the Guidelines and Policies of Plan 2040.

The site is located in the Neighborhood Form District

Neighborhood Form is characterized by predominantly residential uses that vary from low to high density and that blend compatibly into the existing landscape and neighborhood areas. High-density uses will be limited in scope to minor or major arterials and to areas that have limited impact on the low to moderate density residential areas.

The Neighborhood Form will contain diverse housing types in order to provide housing choice for differing ages, incomes and abilities. New neighborhoods are encouraged to incorporate these different housing types within a neighborhood as long as the different types are designed to be compatible with nearby land uses. These types may include, but not be limited to, large lot single family developments with cul-de-sacs, traditional neighborhoods with short blocks or walkways in the middle of long blocks to connect with other streets, villages and zero-lot line neighborhoods with open space, and high density multi-family housing.

The Neighborhood Form may contain open space and, at appropriate locations, civic uses and neighborhood centers with a mixture of uses such as offices, retail shops, restaurants and services. These neighborhood centers should be at a scale that is appropriate for nearby neighborhoods. The Neighborhood Form should provide for accessibility and connectivity between adjacent uses and neighborhoods by automobile, pedestrian, bicycle and transit.

Neighborhood streets may be either curvilinear, rectilinear or in a grid pattern and should be designed to support physical activity for all users and invite human interaction. Streets are connected and easily accessible to each other, using design elements such as short blocks or bike/walkways in the middle of long blocks to connect with other streets. Examples of design elements that encourage this interaction include narrow street widths, street trees, sidewalks, shaded seating/gathering areas and bus stops. Placement of utilities should permit the planting of shade trees along both sides of the streets.

All other agency comments should be addressed to demonstrate compliance with the remaining Guidelines and Policies of Plan 2040.

The proposed higher intensity district is located along a collector roadway with sidewalk connectivity to TARC service nearby along an arterial to the north and along a local road to the south. There is also pedestrian and vehicular connectivity to activity centers. The proposed district is in an area that maintains higher intensities and densities along Buechel Bank Road. The mainly vacant property is proposed to be rezoned to a district providing housing at appropriate locations. The site is connected to the activity center along Buechel Bypass and Bardstown Road. The subject property is easily accessible by bicycle, car, transit, pedestrians and people with disabilities as public sidewalks and transit service are available and connectivity from the site to activity centers is readily available. The proposed district and location support aging in place as distance and transit connectivity to nearby services and amenities reduce travel time to essential services.

A checklist is attached to the end of this staff report with a more detailed analysis. The Louisville Metro Planning Commission is charged with making a recommendation to the Louisville Metro Council

regarding the appropriateness of this zoning map amendment. The Louisville Metro Council has zoning authority over the property in question.

STANDARD OF REVIEW AND STAFF ANALYSIS FOR DDP

- a. The conservation of natural resources on the property proposed for development, including: trees and other living vegetation, steep slopes, water courses, flood plains, soils, air quality, scenic views, and historic sites;

STAFF: The environmental constraints identified on the site are located in an area where no development is occurring. There are no historic resources on the subject site. Tree canopy requirements of the Land Development Code will be provided on the subject site.

- b. The provisions for safe and efficient vehicular and pedestrian transportation both within the development and the community;

STAFF: Provisions for safe and efficient vehicular and pedestrian transportation within and around the development and the community has been provided, and Metro Public Works and has approved the entrance onto Buechel Bank Road.

- c. The provision of sufficient open space (scenic and recreational) to meet the needs of the proposed development;

STAFF: The open space provided on the plan for the multi-family proposal meets the Land Development Code requirements and the needs of the development.

- d. The provision of adequate drainage facilities on the subject site in order to prevent drainage problems from occurring on the subject site or within the community;

STAFF: The Metropolitan Sewer District has approved the preliminary development plan and will ensure the provision of adequate drainage facilities on the subject site in order to prevent drainage problems from occurring on the subject site or within the community.

- e. The compatibility of the overall site design (location of buildings, parking lots, screening, landscaping) and land use or uses with the existing and projected future development of the area;

STAFF: The overall site design and land uses are compatible with the existing and future development of the area. Appropriate landscape buffering and screening will be provided to screen adjacent properties and roadways. Buildings and parking lots will meet all required setbacks.

- f. Conformance of the development plan with the Comprehensive Plan and Land Development Code. Revised plan certain development plans shall be evaluated for conformance with the non-residential and mixed-use intent of the form districts and comprehensive plan.

STAFF: The development plan conforms to applicable guidelines and policies of the Comprehensive Plan and to requirements of the Land Development Code.

REQUIRED ACTIONS:

- **RECOMMEND** that the Louisville Metro Council **APPROVE** or **DENY** the **Change-in-Zoning** from R-4 to R-6
- **APPROVE** or **DENY** the **Detailed District Development Plan**

Based upon the information in the staff report, the testimony and evidence provided at the public hearing, the Planning Commission must determine if the proposal is in conformance with the Comprehensive Plan; OR the existing form district/zoning classification is inappropriate and the proposed classification is appropriate; OR if there have been major changes of an economic, physical, or social nature within the area involved which were not anticipated in Plan 2040 which have substantially altered the basic character of the area.

Neighborhood: Residential

#	Plan 2040 Plan Element	Land Use & Development Policy	Staff Finding	Staff Analysis
1	Community Form: Goal 1	7. Locate higher density and intensity uses near major transportation facilities and transit corridors, employment centers, in or near activity centers and other areas where demand and adequate infrastructure exists or is planned.	✓	The proposed higher intensity district is located along a collector roadway with sidewalk connectivity to TARC service nearby along an arterial to the north and along a local road to the south. There is also pedestrian and vehicular connectivity to activity centers.
2	Community Form: Goal 1	9. Ensure an appropriate transition between uses that are substantially different in scale and intensity or density of development. The transition may be achieved through methods such as landscaped buffer yards, vegetative berms, compatible building design and materials, height restrictions and setback requirements.	✓	The proposed district is in an area that maintains higher intensities and densities along Buechel Bank Road.
3	Community Form: Goal 2	9. Encourage new developments and rehabilitation of buildings that provide commercial, office and/or residential uses.	✓	The mainly vacant property is proposed to be rezoned to a district providing housing at appropriate locations. The site is connected to the activity center along Buechel Bypass and Bardstown Road.
4	Community Form: Goal 3	10. Encourage development to avoid wet or highly permeable soils, severe, steep or unstable slopes where the potential for severe erosion problems exists in order to prevent property damage and public costs associated with soil slippage and foundation failure and to minimize environmental degradation.	✓	A wetland has been identified on the site. No development is occurring in the wetland area.
5	Community Form: Goal 4	2. Encourage preservation of distinctive cultural features including landscapes, natural elements and built features.	✓	A wetland has been identified on the site. No development is occurring in the wetland area.

#	Plan 2040 Plan Element	Land Use & Development Policy	Staff Finding	Staff Analysis
6	Community Form: Goal 4	3. Encourage preservation and/or adaptive reuse of historic sites listed on or eligible for the National Register of Historic Places and/or recognized by the Louisville Metro Landmarks Commission or other national, state or local government historic preservation agencies.	✓	2100 Buechel Bank Rd., there is a circa 1940 masonry home located at 2044 Buechel Bank Rd. that is shown to be removed. The demolition of the structure could have an adverse effect on sites potentially eligible for the National Register. Land Use and Development Goal 4: Community Form in Plan 2040 stresses the protection of historic resources. Historic Preservation staff recommends adaptive re-use of the structure instead of demolition. If structures are over 50 years old and determined eligible for the National Register, as per Wrecking Ordinance Section 150.110, there will be a required 30-day hold on the issuance of the permit. The site is not historic even if the existing building is considered historic.
7	Mobility: Goal 1	4. Encourage higher densities and intensities within or near existing marketplace corridors, existing and future activity centers, and employment centers to support transit-oriented development and an efficient public transportation system.	✓	The proposed higher intensity use is connected to two nearby transit corridors and an activity center zoned for a variety of goods and services. The site is connected to an efficient public transportation system to the north and south of the site.
8	Mobility: Goal 2	4. Avoid access to development through areas of significantly lower intensity or density development if such access would create significant nuisances.	✓	The proposed district is located along a collector roadway where a mix of densities exist and where an activity center exists at the intersection of Buechel Bypass and Bardstown Road (an arterial roadway). Having mixed intensities and densities would not create a significant nuisance with respect to accessing the site.
9	Mobility: Goal 3	2. To improve mobility, and reduce vehicle miles traveled and congestion, encourage a mixture of compatible land uses that are easily accessible by bicycle, car, transit, pedestrians and people with disabilities. Housing should be encouraged near employment centers.	✓	The subject property is easily accessible by bicycle, car, transit, pedestrians and people with disabilities as public sidewalks and transit service are available and connectivity from the site to activity centers is readily available.
10	Mobility: Goal 3	5. Evaluate developments for their impact on the transportation network (including the street, pedestrian, transit, freight movement and bike facilities and services) and air quality.	✓	The sidewalk along the frontage will be a minimum of 5' wide.

#	Plan 2040 Plan Element	Land Use & Development Policy	Staff Finding	Staff Analysis
11	Mobility: Goal 3	6. Ensure that those who propose new developments bear or share in rough proportionality the costs of transportation facilities and services made necessary by development.	✓	All improvements to the right-of-way and/or dedication will be made as requested.
12	Mobility: Goal 3	9. When existing transportation facilities and services are inadequate and public funds are not available to rectify the situation, the developer may be asked to make improvements, roughly proportional to the projected impact of the proposed development, to eliminate present inadequacies if such improvements would be the only means by which the development would be considered appropriate at the proposed location.	✓	The roadway fronting the development site is intended to serve high volumes of vehicular traffic, public sidewalks are available, and transit service is accessible. The development is appropriately located to take advantage of the existing transportation network. Any additional improvements necessary as a result of traffic impact study for the development plan will be addressed.
13	Mobility: Goal 3	10. Ensure that necessary improvements occur in accordance with long-range transportation plans and level of mobility criteria for all modes of travel.	✓	Any roadway improvement will be made with the proposal.
14	Mobility: Goal 3	21. Prevent safety hazards caused by direct residential access to high speed roadways.	✓	No direct access to high speed roadways is provided for individual units. One access point to the site will be provided.
15	Community Facilities: Goal 2	1. Locate development in areas served by existing utilities or capable of being served by public or private utility extensions.	✓	The site will be served by existing utilities or capable of being served by public or private utility extensions.
16	Community Facilities: Goal 2	2. Ensure that all development has an adequate supply of potable water and water for fire-fighting purposes. Locate only very low-density land uses on sites that use on-lot sewage disposal systems or on a private supply of potable water.	✓	The development will have an adequate supply of potable water and water for fire-fighting purposes.
17	Community Facilities: Goal 2	3. Ensure that all development has adequate means of sewage treatment and disposal to protect public health and to protect water quality in lakes and streams as determined by the Metropolitan Sewer District (MSD).	✓	MSD has preliminarily approved the proposal.

#	Plan 2040 Plan Element	Land Use & Development Policy	Staff Finding	Staff Analysis
18	Livability: Goal 1	5. Encourage development that recognizes and incorporates the unique characteristics of identified general landscape types and native plant communities (e.g., upland hardwood forest) throughout Louisville Metro.	✓	The site does not appear to contain unique landscape characteristics. Tree canopy will be provided as required.
19	Livability: Goal 1	17. Determine site susceptibility to erosion; identify the presence of on-site carbonate conditions and features that are vulnerable to site disturbance; identify the extent of existing groundwater use and the impacts of the project on groundwater resources, flow patterns, and existing and proposed surface drainage. Then mitigate potential hazards to such systems resulting from the project.	✓	The proposal will not negatively impact the groundwater.
20	Livability: Goal 1	21. Mitigate negative development impacts to the integrity of the regulatory floodplain by encouraging development patterns that minimize disturbance and consider the increased risk of more frequent flooding events.	✓	A compensation basin is proposed to positively affect any floodplain issues.
21	Housing: Goal 1	1. Encourage a variety of housing types including, but not limited to, detached and attached single family, multi-family, mixed use, zero lot line, average lot, cluster, and co-housing. Allow for accessory residential structures and apartments. Housing types should reflect the Form District pattern.	✓	The proposed district provides for appropriately located high density development between major transit corridors in the Neighborhood form district. The district remains consistent with the pattern of the corridor in provisioning for alternative forms of housing.
22	Housing: Goal 1	2. Promote housing options and environments that support aging in place. Encourage housing for older adults and people with disabilities to be located close to shopping and transit routes and, when possible, medical and other supportive facilities.	✓	The proposed district and location support aging in place as distance and transit connectivity to nearby services and amenities reduce travel time to essential services.
23	Housing: Goal 2	1. Encourage inter-generational, mixed-income and mixed-use development that is connected to the neighborhood and surrounding area.	✓	The proposal continues the existing pattern of mixed-intensity and density along the corridor that is connected to the neighborhood and nearby centers.

#	Plan 2040 Plan Element	Land Use & Development Policy	Staff Finding	Staff Analysis
24	Housing: Goal 2	2. Locate housing within proximity to multi-modal transportation corridors providing safe and convenient access to employment opportunities, as well as within proximity to amenities providing neighborhood goods and services. Higher density, accessible residential uses should be located along transit corridors and in or near activity centers.	✓	The subject site and proposed district provides safe and convenient access to employment opportunities and amenities as distance and transit connectivity to nearby services and amenities reduce travel time to essential services, employment, and amenities in the area and throughout Louisville Metro.
25	Housing: Goal 3	1. Encourage provision of fair and affordable housing by providing a variety of ownership options and unit costs throughout Louisville Metro. Expand opportunities for people to live in quality, variably priced housing in locations of their choice by encouraging affordable and accessible housing in dispersed locations throughout Louisville Metro.	✓	The proposed district encourages fair and affordable housing by allowing a variety of ownership options and unit costs throughout Louisville Metro. The district expands opportunities for people to live in quality, variably priced housing in locations of their choice by enabling the provision of affordable housing in dispersed locations throughout Louisville Metro.
26	Housing: Goal 3	2. As neighborhoods evolve, discourage displacement of existing residents from their community.	✓	The proposed district allows for an increase in residential occupancy where none currently exists on the site.
27	Housing: Goal 3	3. Encourage the use of innovative methods such as clustering, mixed-use developments, co-housing, and accessory apartments to increase the production of fair and affordable housing.	✓	The proposed zoning district allows for a variety of styles and methods of housing to provision the requested density and fair and affordable housing.

4. Proposed Binding Elements

1. The development shall be in accordance with the approved district development plan, all applicable sections of the Land Development Code (LDC) and agreed upon binding elements unless amended pursuant to the Land Development Code. Any changes/additions/alterations of any binding element(s) shall be submitted to the Planning Commission or the Planning Commission's for review and approval; any changes/additions/alterations not so referred shall not be valid.
2. No outdoor advertising signs, small freestanding signs, pennants, balloons, or banners shall be permitted on the site.
3. Construction fencing shall be erected when off-site trees or tree canopy exists within 3' of a common property line. Fencing shall be in place prior to any grading or construction to protect the existing root systems from compaction. The fencing shall enclose the entire area beneath the tree canopy and shall remain in place until all construction is completed. No parking, material storage or construction activities are permitted within the protected area.

4. Before any permit (including but not limited to building, parking lot, change of use, site disturbance) is requested:
 - a. The development plan must receive full construction approval from Construction Review, Louisville Metro Public Works and the Metropolitan Sewer District.
 - b. The property owner/developer must obtain approval of a detailed plan for screening (buffering/landscaping) as described in Chapter 10 prior to requesting a building permit. Such plan shall be implemented prior to occupancy of the site and shall be maintained thereafter.
 - c. A minor subdivision plat or legal instrument shall be recorded dedicating additional right-of-way to Buechel Bank Road to provide a total of 40 feet from the centerline. A copy of the recorded instrument shall be submitted to the Division of Planning and Design Services prior to obtaining a building permit.
 - d. A minor plat or legal instrument shall be recorded consolidating the property into one lot. A copy of the recorded instrument shall be submitted to the Division of Planning and Design Services prior to obtaining a building permit.
 - e. A Tree Preservation Plan in accordance with Chapter 10 of the LDC shall be reviewed and approved prior to obtaining approval for site disturbance.
 - f. The materials and design of proposed structures shall be substantially the same as depicted in the rendering as presented at the January 6, 2022 Planning Commission meeting. A copy of the approved rendering is available in the case file on record in the offices of the Louisville Metro Planning Commission.
5. A certificate of occupancy must be received from the appropriate code enforcement department prior to occupancy of the structure or land for the proposed use. All binding elements requiring action and approval must be implemented prior to requesting issuance of the certificate of occupancy, unless specifically waived by the Planning Commission.
6. The applicant, developer, or property owner shall provide copies of these binding elements to tenants, purchasers, contractors, subcontractors and other parties engaged in development of this site and shall advise them of the content of these binding elements. These binding elements shall run with the land and the owner of the property and occupant of the property shall at all times be responsible for compliance with these binding elements. At all times during development of the site, the applicant and developer, their heirs, successors; and assignees, contractors, subcontractors, and other parties engaged in development of the site, shall be responsible for compliance with these binding elements.
7. Within 90 days of a request by the Planning Director, a pedestrian connection shall be made from the subject site to the commercial property to the east.

REQUEST(S)

- Change in zoning from R-4 to R-6
- Detailed District Development plan with binding elements

CASE SUMMARY/BACKGROUND

The proposal is for 144 multi-family dwelling units on 8.85 acres for a density of 16.27 DU/AC. R-6 permits a density of 17.28 DU/AC. Access to the development is from Buechel Bank Road. 6 buildings are proposed with 152 parking spaces. The three existing lots will be consolidated into one lot. Recreational open space requirements are met with the clubhouse and playground area.

STAFF FINDING

The proposal is ready for a public hearing date to be set.

TECHNICAL REVIEW

The proposal has received preliminary approval from MSD and Transportation Planning.

INTERESTED PARTY COMMENTS

None received.

STANDARD OF REVIEW FOR REZONING

Criteria for granting the proposed form district change/rezoning: *KRS Chapter 100.213*

1. The proposed form district/rezoning change complies with the applicable guidelines and policies Plan 2040; OR
2. The existing form district/zoning classification is inappropriate and the proposed classification is appropriate; OR
3. There have been major changes of an economic, physical, or social nature within the area involved which were not anticipated in Plan 2040 which have substantially altered the basic character of the area.

STAFF ANALYSIS FOR CHANGE IN ZONING

Following is staff's analysis of the proposed rezoning against the Guidelines and Policies of Plan 2040.

The site is located in the Neighborhood Form District

Neighborhood Form is characterized by predominantly residential uses that vary from low to high density and that blend compatibly into the existing landscape and neighborhood areas. High-density uses will be limited in scope to minor or major arterials and to areas that have limited impact on the low to moderate density residential areas.

The Neighborhood Form will contain diverse housing types in order to provide housing choice for differing ages, incomes and abilities. New neighborhoods are encouraged to incorporate these different housing types within a neighborhood as long as the different types are designed to be compatible with nearby land uses. These types may include, but not be limited to, large lot single family developments with cul-de-sacs, traditional neighborhoods with short blocks or walkways in the middle of long blocks to connect with other streets, villages and zero-lot line neighborhoods with open space, and high density multi-family housing.

The Neighborhood Form may contain open space and, at appropriate locations, civic uses and neighborhood centers with a mixture of uses such as offices, retail shops, restaurants and services. These neighborhood centers should be at a scale that is appropriate for nearby neighborhoods. The Neighborhood Form should provide for accessibility and connectivity between adjacent uses and neighborhoods by automobile, pedestrian, bicycle and transit.

Neighborhood streets may be either curvilinear, rectilinear or in a grid pattern and should be designed to support physical activity for all users and invite human interaction. Streets are connected and easily accessible to each other, using design elements such as short blocks or bike/walkways in the middle of long blocks to connect with other streets. Examples of design elements that encourage this interaction include narrow street widths, street trees, sidewalks, shaded seating/gathering areas and bus stops. Placement of utilities should permit the planting of shade trees along both sides of the streets.

Council District:	2-Barbara Shanklin
Case Manager:	Julia Williams, AICP, Planning Supervisor

REQUEST(S)

- Change in zoning from R-4 to R-6
- Detailed District Development plan

CASE SUMMARY/BACKGROUND

The proposal is for 157 multi-family dwelling units on 9.03 acres for a density of 17.28 DU/AC. Access to the development is from Buechel Bank Road. 6 buildings are proposed with 161 parking spaces. The three existing lots will be consolidated into one lot.

STAFF FINDING

The proposal is ready for a neighborhood meeting.

TECHNICAL REVIEW

Address agency review comments.

INTERESTED PARTY COMMENTS

None received.

STANDARD OF REVIEW FOR REZONING

Criteria for granting the proposed form district change/rezoning: KRS Chapter 100.213

1. The proposed form district/rezoning change complies with the applicable guidelines and policies Plan 2040; OR
2. The existing form district/zoning classification is inappropriate and the proposed classification is appropriate; OR
3. There have been major changes of an economic, physical, or social nature within the area involved which were not anticipated in Plan 2040 which have substantially altered the basic character of the area.

STAFF ANALYSIS FOR CHANGE IN ZONING

Following is staff's analysis of the proposed rezoning against the Guidelines and Policies of Plan 2040.

The site is located in the Neighborhood Form District

Neighborhood Form is characterized by predominantly residential uses that vary from low to high density and that blend compatibly into the existing landscape and neighborhood areas. High-density uses will be limited in scope to minor or major arterials and to areas that have limited impact on the low to moderate density residential areas.

The Neighborhood Form will contain diverse housing types in order to provide housing choice for differing ages, incomes and abilities. New neighborhoods are encouraged to incorporate these different housing types within a neighborhood as long as the different types are designed to be compatible with nearby land uses. These types may include, but not be limited to, large lot single family developments with cul-de-sacs, traditional neighborhoods with short blocks or walkways in the middle of long blocks to connect with other streets, villages and zero-lot line neighborhoods with open space, and high density multi-family housing.

The Neighborhood Form may contain open space and, at appropriate locations, civic uses and neighborhood centers with a mixture of uses such as offices, retail shops, restaurants and services. These neighborhood centers should be at a scale that is appropriate for nearby neighborhoods. The Neighborhood Form should provide for accessibility and connectivity between adjacent uses and neighborhoods by automobile, pedestrian, bicycle and transit.

Neighborhood streets may be either curvilinear, rectilinear or in a grid pattern and should be designed to support physical activity for all users and invite human interaction. Streets are connected and easily accessible to each other, using design elements such as short blocks or bike/walkways in the middle of long blocks to connect with other streets. Examples of design elements that encourage this interaction include narrow street widths, street trees, sidewalks, shaded seating/gathering areas and bus stops. Placement of utilities should permit the planting of shade trees along both sides of the streets.

All other agency comments should be addressed to demonstrate compliance with the remaining Guidelines and Policies of Plan 2040.

A checklist is attached to the end of this staff report with a more detailed analysis. The Louisville Metro Planning Commission is charged with making a recommendation to the Louisville Metro Council regarding the appropriateness of this zoning map amendment. The Louisville Metro Council has zoning authority over the property in question.

Neighborhood: Residential

#	Plan 2040 Plan Element	Land Use & Development Policy	Staff Finding	Staff Analysis
1	Community Form: Goal 1	7. Locate higher density and intensity uses near major transportation facilities and transit corridors, employment centers, in or near activity centers and other areas where demand and adequate infrastructure exists or is planned.	✓	The proposed higher intensity district is located along a collector roadway with sidewalk connectivity to TARC service nearby along an arterial to the north and along a local road to the south. There is also pedestrian and vehicular connectivity to activity centers.
2	Community Form: Goal 1	9. Ensure an appropriate transition between uses that are substantially different in scale and intensity or density of development. The transition may be achieved through methods such as landscaped buffer yards, vegetative berms, compatible building design and materials, height restrictions and setback requirements.	✓	The proposed district is in an area that maintains higher intensities and densities along Buechel Bank Road.
3	Community Form: Goal 2	9. Encourage new developments and rehabilitation of buildings that provide commercial, office and/or residential uses.	✓	The mainly vacant property is proposed to be rezoned to a district providing housing at appropriate locations. The site is connected to the activity center along Buechel Bypass and Bardstown Road.
4	Community Form: Goal 3	10. Encourage development to avoid wet or highly permeable soils, severe, steep or unstable slopes where the potential for severe erosion problems exists in order to prevent property damage and public costs associated with soil slippage and foundation failure and to minimize environmental degradation.	+/-	A wetland has been identified on the site, more information on the wetland area is necessary.
5	Community Form: Goal 4	2. Encourage preservation of distinctive cultural features including landscapes, natural elements and built features.	+/-	A wetland has been identified on the site, more information on the wetland area is necessary.

#	Plan 2040 Plan Element	Land Use & Development Policy	Staff Finding	Staff Analysis
6	Community Form: Goal 4	3. Encourage preservation and/or adaptive reuse of historic sites listed on or eligible for the National Register of Historic Places and/or recognized by the Louisville Metro Landmarks Commission or other national, state or local government historic preservation agencies.	+/-	2100 Buechel Bank Rd., there is a circa 1940 masonry home located at 2044 Buechel Bank Rd. that is shown to be removed. The demolition of the structure could have an adverse effect on sites potentially eligible for the National Register. Land Use and Development Goal 4: Community Form in Plan 2040 stresses the protection of historic resources. Historic Preservation staff recommends adaptive re-use of the structure instead of demolition. If structures are over 50 years old and determined eligible for the National Register, as per Wrecking Ordinance Section 150.110, there will be a required 30-day hold on the issuance of the permit.
7	Mobility: Goal 1	4. Encourage higher densities and intensities within or near existing marketplace corridors, existing and future activity centers, and employment centers to support transit-oriented development and an efficient public transportation system.	✓	The proposed higher intensity use is connected to two nearby transit corridors and an activity center zoned for a variety of goods and services. The site is connected to an efficient public transportation system to the north and south of the site.
8	Mobility: Goal 2	4. Avoid access to development through areas of significantly lower intensity or density development if such access would create significant nuisances.	✓	The proposed district is located along a collector roadway where a mix of densities exist and where an activity center exists at the intersection of Buechel Bypass and Bardstown Road (an arterial roadway). Having mixed intensities and densities would not create a significant nuisance with respect to accessing the site.
9	Mobility: Goal 3	2. To improve mobility, and reduce vehicle miles traveled and congestion, encourage a mixture of compatible land uses that are easily accessible by bicycle, car, transit, pedestrians and people with disabilities. Housing should be encouraged near employment centers.	✓	The subject property is easily accessible by bicycle, car, transit, pedestrians and people with disabilities as public sidewalks and transit service are available and connectivity from the site to activity centers is readily available.
10	Mobility: Goal 3	5. Evaluate developments for their impact on the transportation network (including the street, pedestrian, transit, freight movement and bike facilities and services) and air quality.	+/-	The sidewalk along the frontage needs improvement and needs to be a minimum of 5' wide.
11	Mobility: Goal 3	6. Ensure that those who propose new developments bear or share in rough proportionality the costs of transportation facilities and services made necessary by development.	+/-	All improvements to the right-of-way and/or dedication should be made as requested.

#	Plan 2040 Plan Element	Land Use & Development Policy	Staff Finding	Staff Analysis
12	Mobility: Goal 3	9. When existing transportation facilities and services are inadequate and public funds are not available to rectify the situation, the developer may be asked to make improvements, roughly proportional to the projected impact of the proposed development, to eliminate present inadequacies if such improvements would be the only means by which the development would be considered appropriate at the proposed location.	+/-	The roadway fronting the development site is intended to serve high volumes of vehicular traffic, public sidewalks are available, and transit service is accessible. The development is appropriately located to take advantage of the existing transportation network. Any additional improvements necessary as a result of traffic impact study for the development plan should be addressed.
13	Mobility: Goal 3	10. Ensure that necessary improvements occur in accordance with long-range transportation plans and level of mobility criteria for all modes of travel.	+/-	More information is needed.
14	Mobility: Goal 3	21. Prevent safety hazards caused by direct residential access to high speed roadways.	✓	No direct access to high speed roadways is provided for individual units. One access point to the site will be provided.
15	Community Facilities: Goal 2	1. Locate development in areas served by existing utilities or capable of being served by public or private utility extensions.	✓	The site will be served by existing utilities or capable of being served by public or private utility extensions.
16	Community Facilities: Goal 2	2. Ensure that all development has an adequate supply of potable water and water for fire-fighting purposes. Locate only very low-density land uses on sites that use on-lot sewage disposal systems or on a private supply of potable water.	✓	The development will have an adequate supply of potable water and water for fire-fighting purposes.
17	Community Facilities: Goal 2	3. Ensure that all development has adequate means of sewage treatment and disposal to protect public health and to protect water quality in lakes and streams as determined by the Metropolitan Sewer District (MSD).	+/-	MSD will review the proposal. All MSD comments must be addressed prior to a public hearing.
18	Livability: Goal 1	5. Encourage development that recognizes and incorporates the unique characteristics of identified general landscape types and native plant communities (e.g., upland hardwood forest) throughout Louisville Metro.	+/-	The site does not appear to contain unique landscape characteristics. More information on tree preservation is necessary.

#	Plan 2040 Plan Element	Land Use & Development Policy	Staff Finding	Staff Analysis
19	Livability: Goal 1	17. Determine site susceptibility to erosion; identify the presence of on-site carbonate conditions and features that are vulnerable to site disturbance; identify the extent of existing groundwater use and the impacts of the project on groundwater resources, flow patterns, and existing and proposed surface drainage. Then mitigate potential hazards to such systems resulting from the project.	+/-	More information is needed.
20	Livability: Goal 1	21. Mitigate negative development impacts to the integrity of the regulatory floodplain by encouraging development patterns that minimize disturbance and consider the increased risk of more frequent flooding events.	+/-	More information is needed.
21	Housing: Goal 1	1. Encourage a variety of housing types including, but not limited to, detached and attached single family, multi-family, mixed use, zero lot line, average lot, cluster, and co-housing. Allow for accessory residential structures and apartments. Housing types should reflect the Form District pattern.	✓	The proposed district provides for appropriately located high density development between major transit corridors in the Neighborhood form district. The district remains consistent with the pattern of the corridor in provisioning for alternative forms of housing.
22	Housing: Goal 1	2. Promote housing options and environments that support aging in place. Encourage housing for older adults and people with disabilities to be located close to shopping and transit routes and, when possible, medical and other supportive facilities.	✓	The proposed district and location support aging in place as distance and transit connectivity to nearby services and amenities reduce travel time to essential services.
23	Housing: Goal 2	1. Encourage inter-generational, mixed-income and mixed-use development that is connected to the neighborhood and surrounding area.	✓	The proposal continues the existing pattern of mixed-intensity and density along the corridor that is connected to the neighborhood and nearby centers.

#	Plan 2040 Plan Element	Land Use & Development Policy	Staff Finding	Staff Analysis
24	Housing: Goal 2	2. Locate housing within proximity to multi-modal transportation corridors providing safe and convenient access to employment opportunities, as well as within proximity to amenities providing neighborhood goods and services. Higher density, accessible residential uses should be located along transit corridors and in or near activity centers.	✓	The subject site and proposed district provides safe and convenient access to employment opportunities and amenities as distance and transit connectivity to nearby services and amenities reduce travel time to essential services, employment, and amenities in the area and throughout Louisville Metro.
25	Housing: Goal 3	1. Encourage provision of fair and affordable housing by providing a variety of ownership options and unit costs throughout Louisville Metro. Expand opportunities for people to live in quality, variably priced housing in locations of their choice by encouraging affordable and accessible housing in dispersed locations throughout Louisville Metro.	✓	The proposed district encourages fair and affordable housing by allowing a variety of ownership options and unit costs throughout Louisville Metro. The district expands opportunities for people to live in quality, variably priced housing in locations of their choice by enabling the provision of affordable housing in dispersed locations throughout Louisville Metro.
26	Housing: Goal 3	2. As neighborhoods evolve, discourage displacement of existing residents from their community.	✓	The proposed district allows for an increase in residential occupancy where none currently exists on the site.
27	Housing: Goal 3	3. Encourage the use of innovative methods such as clustering, mixed-use developments, co-housing, and accessory apartments to increase the production of fair and affordable housing.	✓	The proposed zoning district allows for a variety of styles and methods of housing to provision the requested density and fair and affordable housing.
