

Photo taken from
(Lost Trl -
street)

Top of hill looking down
at fence. Did not want to
build fence any further
up hill to ensure it
would not cause a
visual nuisance or be
obstructive in any way.

Fence photos and location:

wire is 48" tall. Fence
is slightly over height
in some spots. This
Photo the fence is
49" tall. Although grade/
tree roots caused slight height
differences - the board being above
the wire also protects my cut by
children's hands from being
the wire.

Looking at fence from Alpine way.

Arbor at gate. This structure is Not connected to gate. The tall fence post will be trimmed when new mailbox arrives - delayed significantly due to COVID-19. Arbor sits behind fence.
