Dear Mr. Ott,

Please copy and send my letter to the
full Metro Council

Climate action is very important to me. In order
to survive we must have clean air and clean water.
Climate change is detrimental to all. The oceans are
rising and storms continue to be more severe.

I implore you to make the following a reality
for Louisville:

1. Shift Metro Louisville government facilities to run on
clean, renewable power no later than 2030.
2. Request G & E to shift to all clean, renewable
power no later than 2035.
3. Train local residents to fill the many jobs these energy
transitions would create.

Thank you,

Jamella Sullivan

Jamella Sullivan

Clear energy.

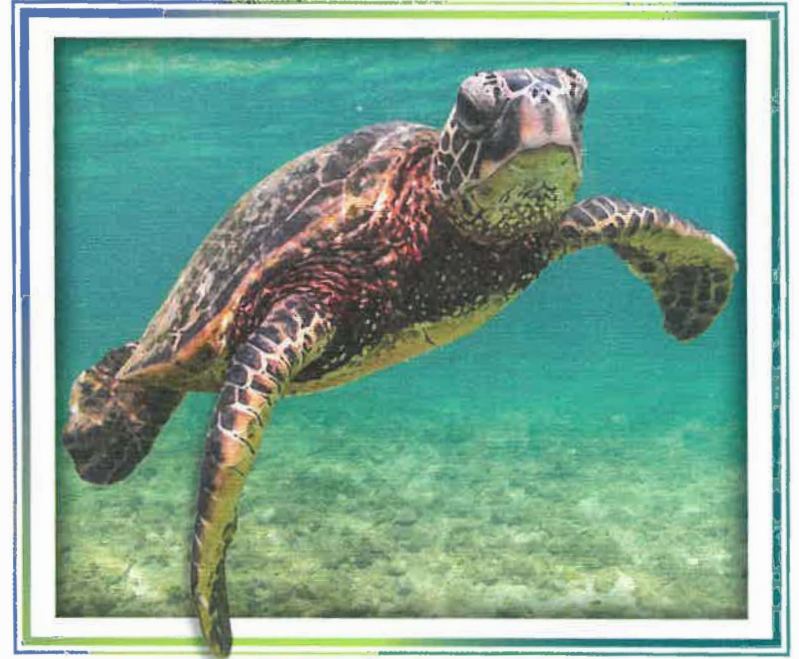

Climate action is important to me because I have two daughters. My wish for them is a clear future!!

Thank you for your attention
to this matter!

Mr OH,

Please share my note with all Metro Council members.

I am writing to request ~~apod~~ support for the following climate action:

Move toward making all Louisville Government facilities clean by. Changing to renewable power

Request that LG&E move to renewable energy.

Create opportunities for job training so local residents can fill jobs created by

3) Train local residents to fill the many jobs these energy transitions would create, especially disenfranchised members of our community.

Climate action is very important to me, because I want a sustainable environment for my health and the future generations - we owe our children a cleaner environment.

Thank you for our time,

Dear Mr. Ott,

Please copy and send my letter to
the full Metro Council.

The following changes are necessary
for Louisville to shift to sustainability,
a change that has been done in cities all
over the world (look at Germany or anywhere else
with a functioning state) and CAN be done in
Louisville.

- We must be able to shift all Louisville government
facilities to run on renewable power,
no later than 2030
- Louisville Gas & Electric Co. must shift entirely
to clean, renewable power no later than 2035
- Train local residents to fill the many jobs these
energy transitions will create, especially the
disenfranchised and those injured by the
harmful energy production means of the
past.

Thank you for your time,

Dear Mr Ott,

I am writing because I care deeply about the threat posed by global man-made climate change. Louisville can be part of the solution.

All Louisville Metro-run government facilities can shift to run on renewables by 2030. LG + E must shift to 100% clean, renewable energy by 2035. Please help realize these goals to protect the future of Kentuckians.

Sincerely,
Hallie Cant

Sept. 9, 2018

Dear Mr. Ott,

Please copy and send my letter to the full Metro Council.

I am writing today to ask that you make the following climate actions a reality. I believe these changes will improve quality of life for citizens, create job opportunities and make Louisville even more attractive to potential businesses and residents. I would like to see the following:

- Shift all Metro Louisville government facilities to run on clean, renewable power no later than 2030.

- Request the Louisville Gas & Electric Co. to shift to all clean, renewable power no later than 2035.

- Train local residents to fill the many jobs these transitions would create, especially disenfranchised members of our community.

Climate action is very important because I have a child and want a future where people can thrive. I believe we all have the right to clean air, clean water and soil. We owe it to our children and future generations to make these necessary changes now, so they will be free tomorrow. Thank you for your time.

Sincerely, Kelly Byrd

Louisville KY 40202

Sept 8, 2018

Dear Mr Ott,

My Name is Andrew Hennessy, and I would like to encourage you and the Louisville Metro Council to pass our recent ~~new~~ resolution to commit to the process of transferring to 100 percent renewable energy.

An independent Boy League study has confirmed that our city has the land and water resources to cover our current power consumption through solar-wind-hydroelectric and landfill reclaimed methane.

I myself recently worked coordinating the plans to install green energy generation equipment at the St Francis Spirituality Center in Southern Indiana - I do not hold any misconceptions about the magnitude of financial investment and rate of return for renewable energy. Though it is no small investment it is worthwhile, both financially, sociologically, and ecologically. Green energy independence will build the image of our city on a national and international scale, encouraging new productive and driven young people to make Louisville ~~our~~ their home and contribute to our future. Most importantly preserves the integrity of our fragile and sacred ecosystem.

As a citizen and a Christian I urge you to take courage and do the right (albeit difficult) thing. Pass the resolution.

Please copy and send this letter to the full Metro Council.

Andrew M Hennessey

The Jane Goodall Institute's Tchimpounga Chimpanzee Rehabilitation Center serves as a refuge in the Congo Basin for chimpanzees orphaned by bushmeat hunters and sold into the cruel exotic pet trade.

Authorities confiscate these young chimpanzees from poachers and people who have purchased them illegally as exotic pets. Many are suffering from serious physical and mental trauma when they arrive at Tchimpounga. Excellent veterinary care, socialization with other chimps, and enrichment activities such as art therapy help these wounded chimpanzees heal.

As the largest chimpanzee sanctuary in Africa, Tchimpounga is home to more than 150 chimpanzees who are free to explore and play in their new home alongside other chimpanzees just like them.

Maria Lucia Potosi Ramirez of San Jose de Chorlavi, Ecuador, is married and the mother of five children. She has spent her lifetime knitting beautiful wool sweaters and selling them in the local market. But the income she earned from selling her handiwork went toward providing daily necessities for her family, which never allowed her to save. When Maria Lucia learned about FINCA in 2001, she took out a loan for \$200 allowing her to purchase more wool at wholesale prices. Now her family eats better food and her loans have tripled, allowing her to purchase and save more. "I'm so grateful because FINCA trusted me. Now I can improve my life and the life of my family."

Please encourage Metro Council to make climate actions a reality by doing the following:

(A) Shifting all Metro Louisville government facilities to run on clean, renewable power no later than 2030,

(B) Requesting LG+E to shift to all clean, renewable power no later than 2035

(C) Training local residents to fill the many jobs these energy transitions would create, especially disenfranchised members of our community.

Climate control is extremely important to me because without action, our world will perish.

Thank you!

WAYNE A. GNATUK

Dear Mr. Ott,

Please copy and send my letter to the full Metro Council.

I'm writing to ask you to do the following to make climate change a reality:

- Shift all Metro Louisville government facilities to run on clean, renewable power no later than 2030.
- Request LG+E to shift to all clean, renewable power no later than 2035.
- Train local residents to fill the many jobs these energy transitions would create, especially disenfranchised members of our community.

Thank you for your time and consideration of this important matter.

Sincerely,
Myrtle Bingham

Stephen Ott,
Metro Council Clerk

5311 Bartonfield Lane
Louisville, KY 40219

Dear Mr. Ott,

Please copy & send my letter to everyone on the Council.

What are you going to do to make the following climate actions a reality here in Louisville?

Please

" Shift all Metro Louisville gov't facilities to run on clean, renewable power no later than 2030,

Request LG+E to shift to all clean, renewable power no later than 2035.

Train local residents to fill the many jobs these energy transitions would create, especially disenfranchised members of our community (West Side).

Climate action is very important to me because I have 5 grandchildren (3 to 23) + I want them to have a livable planet on which to live.

Thank you for your time,
Joy Jamison
Joy Jamison

Dear Mr. Ott,

Please copy and send my letter to the full Metro Council.

I'm writing to ask what you will do to make the following climate actions a reality:

1. Shift all Metro Louisville gov. facilities to run on clean, renewable power.
2. Request that LG&E to shift to all clean, renewable power.
3. Train local residents to fill the many jobs that would be created by the transition to renewable energy/power.

In July and August of 2018 I traveled through the Western States. The states are raged with continual fires. Our brothers and sisters are being displaced from their homes and experiencing great interruptions in their lives. Just this year Kentucky alone experienced a massive flood displacing our own residence and putting us in a state of emergency.

This is truly why I write you.

I believe more than ever after my own personal experience that we must move to be kinder to this one world we have been given and ensure its beauty for future generations.

Thank you for hearing me and taking the time to read this letter.

Melissa S.

Dear Mr. Ott,

9/8/2018

I am here today at the Climate
Action event at 527 W. Jefferson St.

to make a request for our futures.

Work toward 2030 and shift all
metro Lou. government facilities to
run on clean, renewable power.

Also, to get clean, renewable power no
later than 2035 by Lou. Gas &
Electric.

Help train people to fill the jobs
these energy transitions would

create.

This is important to me. I did at
one time live off the grid using
solar / hydro power for all my needs.
The time frame was 1991-2006. This
was in Dreyfus K.K. I live local now
but still do my part at home - Gilbey's
windows, English Cottage power strips
etc. Quilt by Marilyn Foulke
Let's fill better 2011 about our future.
Thank you, Kathy Hogan

9-9-18

Steven Ott,

I am writing to ask you to run on clean, renewable power no later than 2030.

• Shift all Metro Knoxville government facilities to run on clean, renewable power no later than 2030.

• Request LG&E to shift to all clean, renewable power no later than 2030

• Train local residents to sell the many jobs those energy transitions would create, especially deunionized →

members of our community

Climate action is very important to me because we have been robbing God's earth for far too long, i.e. coal mining. Climate change is REAL! I grew up in coal country and know what a filthy environment is - black dust everywhere, black lung disease, hundreds & thousands of acres of farmland destroyed.

Thank you for your support!
Issa Kell

Dear Mr. Ott

I wanted to write this note to support the move of Metro Louisiana government facilities to run on clean renewable power no later than 2013. I appreciate Councilman David James's support of this movement toward trying to help stave off some of the adverse effects of fossil fuel powered energy plants to the environment and hopefully reduce the effects of Global Climate Change. Thanks.

ACE

Dear Mr. Ott,

I hope you will copy and share my note with the full Metro Council.

Climate action is important to me because the management of our earth's resources affects all of us. I believe there are many ways to make positive change. I am writing to ask you to do the following to make climate actions a reality here in Louisville:

* Shift all Metro Louisville government facilities to run on clean, renewable power no later than 2030.

* Request LG&E to shift to all clean, renewable power by 2035.

* Train local residents to fill the many jobs associated with these energy transitions, especially for the disenfranchised.

Thank you for your time and support.

Stacy Moore

Dear Mr. Ott,

Please copy and send my letter to the Metro Council.

I'm writing to ask you to do the following to make climate actions a reality:

- Shift all Metro Louisville government facilities to run on clean, renewable power no later than 2030.
- Request LG+E to shift to all clean, renewable power no later than 2035.
- Train local residents to fill the many jobs these energy transitions would create, especially disenfranchised members of our community.

→ (over)

Climate action is very important to me because addressing the needs of our physical environment seems to be the most basic and essential responsibility we have in stewardship. Current ~~res~~ research indicates drastic and potentially irreversible change to the climate and we have a duty to mitigate the human burden we have placed on the environment.

Thank you for your time,

Sincerely,

Jordan Gage

Dear Mr. Ott,

I am writing as a Louisville resident (Tyler Park) horrified + frightened by climate change, which as this summer's beastly heat, makes clear is here, now.

I urge the Metro Council to make a priority of funding:
~~to~~ to restore the city's tree canopy; implement ^{additional} recycling + composting ^{measures}; require that all city entities purchase at least 20% ^{expansion} locally produced food; and invest in the solar + other renewable energy sources.

Thank you for your attention.

(Dr) Lisa Markowitz
