- 1. A Waiver was granted (Case 9208) from the Louisville Metro Land Development Code to allow a retaining wall within a Landscape Buffer Area.

EROSION PREVENTION AND SEDIMENT CONTROL NOTES

- 1. The approved erosion prevention and sediment control (EPC) plan shall be implemented prior to any land-disturbing activity on the construction site.
2. Any modifications to the approved EPC plan must be reviewed and approved by MSD's private development review office. EPC BMP's shall be installed per the plan and MSD standards.
3. Detention basins, if applicable, shall be constructed first and shall perform as sediment basins during construction until the contributing drainage areas are seeded and stabilized.
4. Actions must be taken to minimize the tracking of mud and soil from construction areas onto public roadways. Soil tracked onto the roadway shall be removed daily.
5. Soil stockpiles shall be located away from streams, ponds, swales and catch basins. Stockpiles shall be seeded, mulched, and adequately contained through the use of all fence.
6. All stream crossings must utilize low-water crossing structures per MSD standard drawing ER-02.
7. Where construction or land disturbance activity will or has temporarily ceased on any portion of a site, temporary site stabilization measures shall be required as soon as practicable, but no later than 14 calendar days after the activity ceases.
8. Sediment-laden groundwater encountered during trenching, boring or other excavation activities shall be assumed to be contaminated and shall be directed to a storm drain or stream, pond, swale or catch basin. All storm drainage shall conform to MSD standard specifications. Construction fencing shall be erected prior to any construction or grading activities preventing encroachment of root systems of trees to be preserved. The fencing shall enclose the area beneath the drip-line of the tree canopy and shall remain in place. No parking, material storage, or construction activities shall be permitted within the fenced area.
