#### 5G Wireless Networking Technology - Verizon Wireless and AT&T

**Attachments:** [031020 Verizon Presentation.pdf](#)  
[031020 5G Explained - What Government Leaders Should Know.pdf](#)

Majid Kahn, Verizon Global Networks & Technology, gave a presentation (attached).

Hood Harris, AT&T Kentucky, spoke about AT&T's 5G network regarding the following:

- improved infrastructure to support the increase in cell phone usage and the new 5G technology
- 5G technology will help connect more devices quicker, increase battery life, and handle more data
- 5G technology has the ability to reshape industry by using artificial intelligence and machine learning, and provide economic opportunities
- 5G technology operates off small cell and existing macro sites

The following spoke to this item:

- Chair Person Coan
- Committee Member George
- Al Andrews, Public Works
- Committee Member Hollander
- Committee Member McCraney
- Committee Member Benson

The following was discussed:

- the number of new permits to install infrastructure such as small cell and fiber
- the reasons for infrastructure not being able to be installed in alleys
- health concerns and studies done by the Federal Communications Commission regarding safe exposure limits
- notification to residents where small cells will be installed
- safety regarding the placement of infrastructure on sidewalks and in right-of-ways
- the meaning of the signs posted on infrastructure being clear
- location of small cells on new polls versus existing polls
- what type of cell phones/equipment can use 5G network
- old 4G small cell infrastructure
- address not given for the sites where small cells will be installed

## Adjournment

Without objection, Chair Person Coan adjourned the meeting at 5:11 p.m.
