GENERAL NOTES:

1. Parking areas and drive lanes to be a hard and durable surface.
2. An encroachment permit and bond will be required for all work done in the right-of-way.
3. There shall be no landscaping in the Right of Way without an encroachment permit.
4. Site lighting shall not shine in the eyes of drivers. If it does it shall be re-aimed, shielded, or turned off.
5. Construction fencing shall be erected prior to any construction or grading activities preventing compaction of root systems of trees to be preserved. The fencing shall enclose the area beneath the drip line of the tree canopy and shall remain in place. No parking, material storage, or construction activities shall be permitted within the fenced area.
6. Mitigation measures for dust control shall be in place during construction to prevent fugitive particulate emissions from reaching existing roads and neighboring properties.
7. Construction plans, bond and permit are required by Metro Public Works prior to construction approval.
8. All roadway and entrance intersections shall meet the requirements for loading areas as set by Metro Public Works.
9. Compatible utility lines (electric, phone, cable) shall be placed in a common trench unless otherwise required by appropriate agencies.
10. West Orell Rd shall be improved along the property frontage to provide 12' from centerline pavement widening and 6'-8" unpaved shoulder per Metro Public Works Standards.
11. Upon development or redevelopment of adjacent properties, a unified access and circulation system shall be developed to eliminate preexisting curb cuts and provide for vehicular movement throughout adjacent sites as determined appropriate by the Department of Public Works. A cross access agreement to run with the land and in a form acceptable to Planning Commission legal counsel shall be recorded prior to the time of construction approval for the adjacent property to be developed.

MSD NOTES:

1. Sanitary sewer service will be provided by connection and subject to applicable fees.
2. No portion of the site is within the 100 year flood plain per FIRM Map No. 21111C0121E dated December 5, 2008.
3. Drainage pattern depicted by arrows (→) is for conceptual purposes. Final configuration and size of drainage pipes and channels shall be determined during the construction plan design process. Drainage facilities shall conform to MSD requirements.
4. Site will be subject to MSD Regional Facilities Fee.
5. If the site has thru drainage an assessment plan will be required prior to MSD granting construction plan approval.
6. A Downstream Facilities Capacity Request will be submitted to MSD.
7. The final design of this project must meet all MS4 water quality regulations established by MSD. Site layout may be taken at the design phase due to proper sizing of Green Best Management Practices.
8. Erosion & Silt Control shown is conceptual only, and final design will be determined on construction plans.
9. Prior to any construction activities on the site a Erosion & Silt Control Plan shall be provided to MSD for approval.
10. No increase of surface run off onto any of the adjacent properties along Dixie Hwy or the adjacent single family residential properties along W. Orell Rd.
11. A sanitary sewer capacity request was submitted to MSD on September 8, 2017.

EROSION PREVENTION AND SEDIMENT CONTROL NOTES

1. The approved erosion prevention and sediment control (EPSC) plan shall be implemented prior to any land-disturbing activity on the construction site.
2. Any modifications to the approved EPSC plan must be reviewed and approved by MSD's private development review office. EPSC BMP's shall be installed per the plan and MSD standards.
3. Detention basins, if applicable, shall be constructed first and shall perform as sediment basins during construction until the contributing drainage areas are seeded and stabilized.
4. Actions must be taken to minimize the tracking of mud and soil from construction areas onto public roadways. Soil tracked onto the roadway shall be removed daily.
5. Soil stockpiles shall be located away from streams, ponds, swales and catch basins. Stockpiles shall be seeded, mulched, and adequately contained through the use of silt fence.
6. All stream crossings must utilize low-water crossing structures per MSD standard drawing ER-02.
7. Where construction or land disturbance activity will or has temporarily ceased on any portion of a site, temporary site stabilization measures shall be required as soon as practicable, but no later than 14 calendar days after the activity has ceased.
8. Sediment-laden groundwater encountered during trenching, boring or other excavation activities shall be pumped to a sediment trapping device prior to being discharge into a stream, pond, swale or catch basin. All storm drainage shall conform to MSD standard specifications.
9. Construction fencing shall be erected prior to any construction or grading activities preventing compaction of root systems of trees to be preserved. The fencing shall enclose the area beneath the dripline of the tree canopy and shall remain in place. No parking, material storage, or construction activities shall be permitted within the fenced area.
