Thank you Nia,

That reminds of something:

One of the reasons I need a fence at such a height is to provide privacy from the buses frequenting the adjacent school. The children yell profanities at me, and no kidding: they bark at my dogs. My dogs don't bark back.

Let me know if I need to do anything to get that information in the application.

It's something I forgot because, when it's cold, the bus windows are typically rolled up. The past few days have been warm, and I was reminded.

Thanks again,

Good Morning Stephen,

I did receive your affidavit and notice card.

The Board of Zoning Adjustment is a public hearing. If your neighbors would like to come and speak there will be time in the meeting for them to do so. If there are some neighbors who are unable to make it to the meeting they can email me and I will pass their comments on to the Board members. Closer to the hearing date I will let you know your place on the agenda and give you a link to the case documents for your review.

Thank you.

Yes, it will emanate downwards, and the post cap lights are very very dim. I can provide an example if necessary.

The sign blew away overnight one of the weekend nights and I reattached it with brad nails. I think it would be more secure with a screw or two. Am I allowed to do that?

Good Morning Stephen,

I will include your email with the justification page and other documents for the Board to review.

I do have one question about the lighting attached to the fence: Will the light be directed downward and away from neighboring properties?

Thank you,

Nia Holt
