Mr. Brown,

I have reviewed the Site Plan showing valet drop-off and streetscape design dated August 8, 2016. Based on the conceptual design, no obstructions are apparent that would prevent the proposed configuration from being ADA compliant. You indicated that a 4' wide sidewalk is acceptable in the limited area where the sidewalk passes through the valet drop off. We find this to be an acceptable solution understanding that the majority of areas adjacent to the sidewalk are hardscape and will provide ample room to safely traverse the sidewalk area.

Sincerely,

A handwritten signature in black ink that reads 'Robert Martin'.
