Subject: RE: apartments off of Gagel Avenue

Hello Ann.

LG&E pipeline engineer and manager of LG&E's gas storage dept, Mike Cummins has reviewed your development plans; more specifically your request to install a fence with our gas transmission easement.

Mr. Cummins has informed me that LG&E will allow a wooden fence to be located within our gas transmission easement per your submitted plans. Additionally, LG&E will not allow trees or shrubs to be planted within said easement.

Should you have further questions feel free to contact me.

Sincerely,

Jeff Kuriger,
LG&E Lead Right of Way Agent
