Kyle, responses from Scott Lusk below. Note the highlighted as he had omitted concrete cutting.

Frost proof fountain will not have to be turned off and drained each year and the batteries should last at least a year. The cost on changing them out every year would be about \$95. I need to add \$1328 to each quote I missed cutting the concrete and digging down 3 feet for frost proof fountain. I apologize for the mistake

Thanks so much, Mark.

Would these "freeze resistant" water fountains still need to be turned off and on for the seasons?

Also, my biggest concern with the Murdock is the battery pack that is required. Do you know how often it needs to be changed? What's the pricing when it needs to be replaced?

I'll discuss with my boss and get back to you.

Thanks again!
Kyle

Mark,

Good morning! I apologize in the delayed response. I have spoken with Lusk and a few other agencies, and we are going to select the Elkay model in blue with the bottle filler, regular water fountain and pet fountain features that is freeze resistant.

As I understand it, the costs will be as follows:

Elkay fountain - \$13,452
Cutting of concrete and digging - \$1,328

Total cost \$14,780.

Will Facilities accept these funds from D9?

Thanks,
Kyle
