Subject: BOZA Hearing for Chamberlain Senior Care

We own a home in Norton Commons and want you to know that we support adding the deceleration lane on Chamberlain Drive at the entrance to the facility, which would address safety and traffic control issues. Chamberlain is a narrow road and you need this lane to avoid congestion and possible accidents. We also support an open entrance to the facility, not one with a locked gate. A locked gate at the entrance would also impair traffic flow and, possibly, divert traffic into Norton Commons along a circuitous route to what will be the rear entrance to the facility. Not very convenient for those who visit the facility.
