

October 2014

To Whom It May Concern:

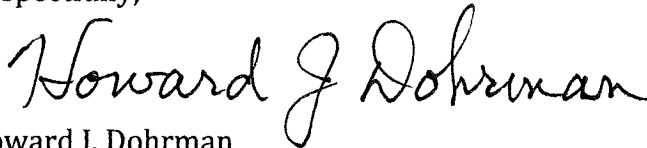

The St. Matthews City Council recently passed an ordinance regarding property signage that would allow the signage on the property of 4165 Westport Road that faces Westport Road to be increased in height.

The tenants of the office building at 4165 Westport Road are seeking approval from St. Matthews to extend the sign in order to allow all tenants equal space on the sign.

St. Matthews will not approve an extension of the sign, even though such extension is allowed under the new ordinance, because a binding element to the 1976 development plan is on file with Louisville Metro Planning and Design Services.

This application seeks an amendment to binding elements that would allow the existing signage to be modified in accordance with St. Matthews ordinances.

Respectfully,

Howard J. Dohrman
Property Owner
