Good morning!

After consulting with Councilwoman Parker, our D-18 office would like to fund the following projects:

- 1.) 4704 Lowe Rd – estimate 35K – sidewalk drainage project.
- 2.) 4406-08-10 Lowe Rd – 25K – new installation.

I will do a CIF as time permits. Will Metro Public Works accept the funds? Thank you in advance!

Subject: New Sidewalk Estimate in front of 4408 Lowe Road

CW Parker / Dan,

The cost for a new sidewalk connection along the south side of Lowe Road in front of 4408 Lowe Road would be \$25,000. It is my understanding that the current property owner is not overly thrilled about a new sidewalk there. I don't get that, this is a relatively simple and obvious sidewalk connection.

Subject: New Sidewalk Estimate in front of 4408 Lowe Road

Good afternoon!

I sent an email stating we wanted to do this. The Councilwoman did ask that P.W. update the property owners that this was going to occur prior to work starting. Also, she was asking about taking the sidewalk around the tree in question, like we did on Ward Ave. We did a "half moon" around that tree on Ward and didn't get into the roots at all.

Good morning Jim!

I am going to speak to the Councilwoman further on this. I will get back soon. I respect the family's opinion however feel it may be in the best interest of the area especially with the ROW. We should be able to give them some sort of reasonable tree assurances that is time sensitive.

Also, my original question was the 2024 estimate was 25K. Is that still close?

Subject: Fw: New Sidewalk Estimate in front of 4408 Lowe Road

Dan,

Steve asked that I send a summary of my interaction with Jay Trautwein in September 2024 when I was preparing the estimate.

Jay and his mother (Linda) currently reside at 4408, and the Trautwein family is the only family that has lived in the home. I've known Jay for 30 years by way of my partnership in Birch, Trautwein and Mims. Ted Trautwein is Jay's uncle.

Jay is adamantly opposed to a sidewalk being constructed in front of their home. He does not think it is needed and has concerns about the impact the construction would have on a tree his grandfather planted fifty years ago. I don't agree with either of Jay's concern.

Jay went on to say that the Tasman family, who owns the property at 4406 Lowe Road, was also opposed to a sidewalk being constructed along the front of their property.

Nevertheless, the City of Cambridge has continually pushed for the construction of this sidewalk segment because it is the only unconstructed part of an important pedestrian connector to DePres Park. I think the City of Lincolnshire shares the same sentiment.

Metro has ample right-of-way to construct a five-foot-wide sidewalk and verge without much difficulty.

Let me know if you have any questions.

Hi! Just wanted to be sure you received this email. Thank you!

Hi Steve!

I know Thierry reach out to you on this. No rush but we would like an estimate on this project. I might combine it (depending on the cost) and the 4402 Lowe Rd to Ashfield Lane project. The last estimate on that, at the end of 2024 was 25K. I think the property owner was not super happy about the possibility either but... If cost feasible I would do one CIF to combine both project since both on Lowe Rd if that was possible.

Dan,

Our inspection team reviewed the area and determined that this will be a major project rather than a simple sidewalk raise for drainage. The necessary repairs will impact multiple locations and may involve private properties to ensure proper drainage. As a result, a full engineering plan will be required.

Please see the detailed inspection notes below. I have also reached out to Steve Kurowsky, who manages projects of this nature, and he is available to assist. Please coordinate with him to develop a cost estimate and next steps.

Subject: Re: 4704 Lowe Road sidewalk

Hey Thierry,

Bobby and I reviewed and came to the conclusion that this is going to turn into a major project to get this water to drain correctly. The sidewalk is at a low point and due to minimal drainage, you will be chasing more issues by trying to raise to drain. The biggest culprit is 4706's driveway which is very high and blocking positive drainage to run down to CB @ 4708. We could possibly remove 75% of the driveway and get to function as intended, but would also require consent releases etc., and by the looks of it they probably would not want us on their property to tie back into the entrance of their garage. That work would also need to include regrading yards down to almost 4708. It doesn't hurt to try though.

We could install a drain, but that would include everything I mentioned, plus running pipe to 4708's CB (150'+).

If council is adamant, I would get Steve K to have an actual plan drawn up to get this area to function properly.

Let me know your thoughts.

Thanks

Subject: Re: 4704 Lowe Road sidewalk

Hi Dan,

Based on the report below and our field inspection, the issue appears to be likely due to grading and drainage conditions.

To address it, we would recommend raising the sidewalk and installing a drain pipe beneath it to allow water to pass. Additionally, the yard may need to be regraded, or a yard drain installed to improve drainage and prevent water from pooling.

Thanks,

Good morning!

Ok...with no leak found what is your suggestion on this sidewalk? Has it just naturally sunk or has the yard/grass/soil grown higher, blocking the run-off? Below is the LWC assessment:

"There is limited drainage at the street side of 4704, with drain facilities appearing to be at the rear of the property. There is a catch basin at the front side between 4708 and 4710; however, the drain channel in the neighbor's driveway to the south appears to be at a higher elevation than 4704, so there's really no where for water to go in the current configuration. Regardless, with all the recent rain, there was no standing water in the area."

What's your thoughts?

Cc: Vince Guenthner <vguenthner@louisvillewater.com>
Subject: RE: 4704 Lowe Road sidewalk

All,

I went by the site this afternoon. I also compared it to historical google street view imagery. There does not appear to be a water main leak and there is no leak registering at the meter. This section of sidewalk, and several others in this area, appear to have been installed to grade with little to no drop to the soil, so this exacerbates water and silt retention. The sidewalk is in good shape with no indication of significant cracking or settlement. There is limited drainage at the street side of 4704, with drain facilities appearing to be at the rear of the property. There is a catch basin at the front side between 4708 and 4710; however, the drain channel in the neighbor's driveway to the south appears to be at a higher elevation than 4704, so there's really no where for water to go in the current configuration. Regardless, with all the recent

rain, there was no standing water in the area. I'll have our leak surveyor check the area when he returns next week, but I don't expect he'll find anything either.

Please let me know if you have any questions.

Thanks,
Greg

Subject: 4704 Lowe Road sidewalk

Good evening, Vince! I have an email and quick video from 4704 Lowe Rd. The sidewalk is very, very low and holds water bad. I normally would forward this to Metro Public Works only, however, as you see on the video, there is an LWC utility area with a cap that Mrs. Armstrong states is now floating. I am worried there might be an LWC leak in this area. At the very least if the cap is off it needs to be re-secured and hopefully the utility is not damaged. Can LWC investigate this cap/utility/sidewalk to determine if anything LWC wise has caused this sidewalk to sink? I know if there is a leak that could cause the area to sink. If there is no LWC issue, can the utility be inspected to determine no damage and the cap re-secured? At that point I will ask Public Works to inspect and determine a proper course of action. Please feel free to contact Mrs. Armstrong to get any further information needed. Thank you in advance and I realize this is Memorial Day and this may not get attention until the next few days.

From: Beth Truax Armstrong <noreply@formresponse.com>

Our sidewalk and the utilities in front of it are too low and the sidewalk floods for over 24 hours after a rain. It causes an issue for walkers who have to go onto Lowe Rd because it's normally 4-6 inches deep. MSD said it's not their domain. Not sure who to contact to get this fixed but it's been an issue for a long time and I feel awful to be displacing so many walkers, joggers and families onto Lowe Rd. It's probably also a little dangerous with the utilities. The lid to the water access is floating in the picture. It was 6-7 inches underwater when we first came out side but then it floated up.

Subject: RE: 2 Sidewalk projects on Lowe Rd

We can definitely reach out to them with our intentions, but I assume some of our driveway replacement costs would get out of the R/W, which normally happens on a lot of our new sidewalk projects. So most homeowners usually work with our inspectors/contractor to get the desired finished product that they are happy with. If one of these is NOT willing to allow us to make the improvements slightly off of the R/W onto to their property, we could have a little problem there.

Good morning!

Steve will anyone speak to the affected property owners about the 4704 Lowe Rd drainage project. In the notes it stated several addresses may be affected. Mr. Mims said he will make sure to speak to those at the other project at 4406-08-10 Lowe Rd. Also, with this being budget time and Metro Council out the 1st part of July, this CIF will take a minute. I know you said there is plenty of work, but I just wanted you to know.

Metro Public Works will accept the funds for these listed projects.

Good morning!

After consulting with Councilwoman Parker, our D-18 office would like to fund the following projects:

- 1.) 4704 Lowe Rd – estimate 35K – sidewalk drainage project.
- 2.) 4406-08-10 Lowe Rd – 25K – new installation.

I will do a CIF as time permits. Will Metro Public Works accept the funds? Thank you in advance!
