What is the case number of the development application? \* 21-CFR-0025

Comments \*

The city of Louisville and the city of Shively has not served the residents or business owners well along 7th Street road for years! It has never been developed to serve tax paying residents affected by the dumping of old cars, and ignoring the questionable CLUBS along this stretch of road. The companies producing who knows what and lets not leave out the nasty trailer park some slum lord is collecting hard earned money for! So now the only solution to cars that have sat for years and not processed in any manor needs to be placed on land that could be developed into something useful? We are not impressed with this PLAN at all! This area is already bad enough, and you just signaled surrounding residents that one more piece of junk won't matter, try that in Prospect or The Highlands or any other neighborhood where people give a damn about not just their front yard, but the back yard too. We suggest that you make it work where it is and fire the team that should have made it work after all these years of over charging and making it difficult for most people to retrieve their vehicle, space is not the only issue here and we don't want it repeated anywhere else. Why pave a road that leads to nowhere! we want a change along 7th Street Rd and for that matter the visible mess from Crums Lane and Dixie Hwy north to 18th and Broadway needs to see tax dollars at work!

Would you like the Louisville Metro case manager to contact you to discuss your comments? \* No
