Christopher Fuller, AIA

Project Role: Principal-In-Charge

Christopher Fuller, Principal with K. Norman Berry Associates Architects (KNBA), is experienced in all phases of planning, design and construction and has an extensive background in the ability to deliver any project from conception to completion. Throughout Christopher's 26 years of experience, he has managed projects that range from \$50 thousand to over \$50 million. Many of Christopher's projects have a unique set of design standards and he is constantly learning and building his design portfolio with new building types.

Christopher has become adept at managing large teams to execute complex, detail-oriented projects and oversees all phases of the project. He also has particular expertise developing space utilization plans, evaluating buildings for compliance with fire and accessibility codes and coordinating with municipalities and agency groups.

Christopher's leadership and project management experience includes but is not limited to:

University of Louisville Belknap Academic Building – New Facility, Louisville, Kentucky

Project Manager for this \$58M new construction facility collaborating with over 14 consultant teams and University administrators. Facilitating excellent communication is the key to keeping the Owner's desires at the forefront of the design and the consultants on time and budget.

Speed Art Museum – Master Plan, Renovation and Addition, Louisville, Kentucky

Project Manager, working with WHY Architecture, was entrusted with the responsibility to add to, renovate and clarify the museum building and obtain LEED certification for the resultant structure. These efforts have updated the facility to current museum standards. This multi-phased, internationally recognized and award-winning, \$50M building expansion project has achieved LEED Gold® status.

First Presbyterian Church of Lexington – Master Plan, Lexington, Kentucky

Principal-in-Charge for this complete detailed campus master plan and building assessment of the current facilities for First Presbyterian Church of Lexington. The outcome of this master plan provided a comprehensive understanding of the highest and best use of all of the church facilities and properties. This master plan provided a roadmap for improvements in proper sequence with cost estimates.

Kentucky State Capitol – Master Plan, Frankfort, Kentucky

Project Manager for this master plan effort. Christopher led a team of both national and local consultants that would identify and address the issues of the building's current state and plot a course for future improvements. This master plan has been the basis for the restoration of the Capitol, Capitol Annex, Executive Office Building, and a new service tunnel between the facilities.

Louisville Slugger Baseball Stadium/Brinly Hardy Warehouse – Renovation, Louisville, Kentucky

As Project Architect, Christopher collaborated with HNTB Architects to convert this structure that encompasses more than 62,000 sf and houses 22,000 sf of restaurant and future retail space. The KNBA teams primary responsibility was the restoration of the historic train depot, while HNTB Architects was primarily responsible for the design of the ballpark.

Artek Lofts – New Condominiums, Lexington, Kentucky

Principal-in-Charge for this 37,400 sf building that responded to the historic streetscape with appropriately scaled infill-two and three story loft units. The siting of the units created a central courtyard area between the new buildings.

Oldham County Schools – Master Plan and System-Wide Security Upgrade – Oldham County, Kentucky

Project Manager for multiple campus master plans within the school corporation, including system-wide security upgrade and enhancements.
