

**Big Bar**  
1200-1202 Bardstown Road, Louisville, KY 40204

This parking study was prepared by Kevin Bryan, owner of Big Bar, and is in accordance with the requirements of Louisville Metro Public Works and with direction from Planning and Design Services. Planning and Design Services specified the days and times of the parking study.

The study area contains street parking within 1000 feet of 1200-1202 Bardstown Road, Louisville, KY 40204 (Map of Study Area.) For the purposes of this study, all parking spaces met the requirements for a street space of 20 feet per car. In addition, required distances from fire hydrants, public transportation stops, intersections, public streets and driveways and any other parking restrictions or limitations were also met.

There is a total of 404 on-street parking spaces within 1000 feet of our establishment that meet the abovementioned criteria and are available to customers.

The maximum number of parking spaces that were occupied or unavailable (Parking Spot Data) at any time was 212 parking spaces leaving a minimum of 192 spaces available at any given time within the study limits.

Attempts were unsuccessful to procure joint parking agreements with all businesses within 1000 feet. In addition, the property owners will make significant improvements to the building overall.

In conclusion, based on the number of spaces counted, the proposed study shows there is ample on-street parking for patrons visiting the proposed location. Furthermore, given the number of spaces available, the project will not adversely affect traffic to other businesses in the area that require street parking for their patrons.
