

## Energy Dashboard

### [Louisville Metro Government's Quarterly Energy Report](#)

The energy dashboard is designed to provide a high-level understanding of our energy profile, using graphics automatically generated by our benchmarking platform EnergyCAP as billing data is received.

Numerous energy management strategies are being implemented to help track and reduce energy use within Louisville Metro Government, including utility billing analysis and building optimization efforts. Improving utility data management and benchmarking is a top priority and is still a work in progress. The energy dashboard is designed to provide a high-level understanding of our energy profile, using graphics automatically generated by our benchmarking platform as billing data is received.
