

Case No. 15ZONE1050

Zoning Change from R-6 to OR-3 and C-2

WHEREAS, The Traditional Neighborhood Form District is characterized by predominantly residential uses, by a grid pattern of streets with sidewalks and often including alleys. Residential lots are predominantly narrow and often deep, but the neighborhood may contain sections of larger estate lots, and also sections of lots on which appropriately integrated higher density residential uses may be located. The higher density uses are encouraged to be located in centers or near parks and open spaces having sufficient carrying capacity.

There is usually a significant range of housing opportunities, including multi-family dwellings; and

WHEREAS, the Louisville Metro Planning Commission finds, traditional neighborhoods often have and are encouraged to have a significant proportion of public open space such as parks or greenways, and may contain civic uses as well as appropriately located and integrated neighborhood centers with a mixture of mostly neighborhood-serving land uses such as offices, shops, restaurants and services. Although many existing traditional neighborhoods are fifty to one hundred twenty years old, it is hoped that the Traditional Neighborhood Form will be revitalized under the new Comprehensive Plan. Revitalization and reinforcement of the Traditional Neighborhood Form will require particular emphasis on (a) preservation and renovation of existing buildings in stable neighborhoods (if the building design is consistent with the predominant building design in those neighborhoods), (b) the preservation of the existing grid pattern of streets and alleys, (c) preservation of public open spaces; and

WHEREAS, the Louisville Metro Planning Commission further finds the proposal does not affect the existing street pattern. Sidewalks are provided within all rights of way. The proposal is for a zoning district that permits neighborhood serving uses. The proposal preserves public open spaces and the public realm of the right of way. New open spaces are created with the proposal. The proposal is for the preservation and renovation of existing buildings for commercial or residential purposes. The existing structure is historic and represents the industrial past of the neighborhood. The proposal will not create a new center but is considered a repurposing of an existing center. The proposal is located in a higher density single family residential neighborhood. The proposal is compact and results in an effective land use pattern. The areas infrastructure is already set up to serve an industrial which indicates it will be able to serve residential as well, which is cost effective. The proposal is for mixed use which will reduce trips and will support alternate transportation with sidewalks around the site. Transit is located nearby along E Oak Street which will serve the site as well.
