

# Planning Commission

## Staff Report

February 17, 2022

<b>Case No:</b>	21-ZONE-0117
<b>Project Name:</b>	Westport Office
<b>Location:</b>	917 & 919 Fountain Avenue, 4700 Westport Rd
<b>Owner(s):</b>	Estate of Evelyn Kaelin
<b>Applicant:</b>	Louisville Spine & Wellness
<b>Jurisdiction:</b>	Louisville Metro
<b>Council District:</b>	7 – Paula McCraney
<b>Case Manager:</b>	Dante St. Germain, AICP, Planner II

### REQUESTS

- **Change in zoning** from R-5 Single Family Residential to OR Office Residential
- **Waiver** from Table 10.2.3 to allow encroachment into a required property perimeter Landscape Buffer Area (LBA) (21-WAIVER-0166)
- **Variances**
  1. From Table 5.3.2 to allow encroachment into a required non-residential to residential setback (required: 30', requested: 10', variance of 20') (21-VARIANCE-0182)
  2. From section 5.1.12.B.2.e.i.1 to permit a principal structure to exceed the allowed maximum infill front yard setback (required: 30', requested: 60', variance of 30') (22-VARIANCE-0010)
- **Detailed District Development Plan** with Binding Elements

### CASE SUMMARY/BACKGROUND

The subject site is located on Westport Road at the intersection with Fountain Avenue, near the I-264 interchange. The site consists of three contiguous properties. The applicant proposes to rezone the property to OR to construct a new 6,250 square foot medical office building with associated parking.

The site is generally surrounded by R-4 and R-5 zoned property in single family residential use. Vacant commercial zoning exists a block to the south-west, and an activity center with a variety of zoning districts starts two and a half blocks to the north-east, around the intersections with Herr Lane and Lyndon Lane.

### STAFF FINDING

Staff finds that the proposed zoning change meets the guidelines of the Comprehensive Plan. The site plan meets the requirements of the Land Development Code, and generally meets the guidelines of the Comprehensive Plan. The waiver is adequately justified and meets the standard of review. The variances are adequately justified and meet the standard of review.

### TECHNICAL REVIEW

Plan 2040

Land Development Code (Louisville Metro)

MSD and Transportation Planning have provided preliminary approval of the proposal.

### **INTERESTED PARTY COMMENTS**

Staff has received one email from attorney Steve Porter in support of the zoning request conditioned on the site plan being oriented so that the parking is located between the building and Westport Road. Staff received an email in opposition to the request on the grounds that there is enough commercial in the vicinity already.

### **STANDARD OF REVIEW FOR REZONING**

Criteria for granting the proposed form district change/rezoning: *KRS Chapter 100.213*

1. The proposed form district/rezoning change complies with the applicable guidelines and policies Plan 2040; **OR**
2. The existing form district/zoning classification is inappropriate and the proposed classification is appropriate; **OR**
3. There have been major changes of an economic, physical, or social nature within the area involved which were not anticipated in Plan 2040 which have substantially altered the basic character of the area.

### **STAFF ANALYSIS FOR CHANGE IN ZONING**

The site is located in the Neighborhood Form District

The Neighborhood Form is characterized by predominantly residential uses that vary from low to high density and that blend compatibly into the existing landscape and neighborhood areas. High-density uses will be limited in scope to minor or major arterials and to areas that have limited impact on the low to moderate density residential areas.

The Neighborhood Form will contain diverse housing types in order to provide housing choice for differing ages, incomes and abilities. New neighborhoods are encouraged to incorporate these different housing types within a neighborhood as long as the different types are designed to be compatible with nearby land uses. These types may include, but not be limited to, large lot single family developments with cul-de-sacs, traditional neighborhoods with short blocks or walkways in the middle of long blocks to connect with other streets, villages and zero-lot line neighborhoods with open space, and high density multi-family housing.

The Neighborhood Form may contain open space and, at appropriate locations, civic uses and neighborhood centers with a mixture of uses such as offices, retail shops, restaurants and services. These neighborhood centers should be at a scale that is appropriate for nearby neighborhoods. The Neighborhood Form should provide for accessibility and connectivity between adjacent uses and neighborhoods by automobile, pedestrian, bicycle and transit.

Neighborhood streets may be either curvilinear, rectilinear or in a grid pattern and should be designed to support physical activity for all users and invite human interaction. Streets are connected and easily accessible to each other, using design elements such as short blocks or bike/walkways in the middle of long blocks to connect with other streets. Examples of design elements that encourage this interaction include narrow street widths, street trees, sidewalks, shaded seating/gathering areas and bus stops. Placement of utilities should permit the planting of shade trees along both sides of the streets.

Following is staff's analysis of the proposed rezoning against the Goals, Objectives and Policies of Plan 2040.

The zoning change to OR is appropriate as the site is located on a corner lot along Westport Road, a minor arterial at this location. Isolated low-intensity commercial or office uses are appropriate in the Neighborhood form at appropriate locations. The proposal would allow neighborhood-serving office uses in an existing neighborhood near housing, but accessible from Westport Road. Access to the site would be a short way down Fountain Avenue, impacting few neighboring residents.

The proposed zoning district is generally in compliance with the plan elements and CHASE principles of Plan 2040. All other agency comments should be addressed to demonstrate compliance with the remaining Goals, Objectives and Policies of Plan 2040.

A checklist is attached to the end of this staff report with a more detailed analysis. The Louisville Metro Planning Commission is charged with making a recommendation to the Louisville Metro Council regarding the appropriateness of this zoning map amendment. The Louisville Metro Council has zoning authority over the property in question.

### **STANDARD OF REVIEW AND STAFF ANALYSIS FOR WAIVER OF TABLE 10.2.3**

- (a) The waiver will not adversely affect adjacent property owners; and

STAFF: The waiver will not adversely affect adjacent property owners as the required screening is proposed to be provided in the reduced landscape buffer area.

- (b) The waiver will not violate specific guidelines of Plan 2040; and

STAFF: The waiver will not violate specific guidelines of Plan 2040 as Plan 2040 encourages adequate buffering between uses which are of substantially different intensity or density. The required screening and planting material is proposed to be provided.

- (c) The extent of the waiver of the regulation is the minimum necessary to afford relief to the applicant; and

STAFF: The extent of the waiver of the regulation is the minimum necessary to afford relief to the applicant as the building is at its current location due to the width of drive aisles and parking in the parking lot, and the building size is needed to provide the applicant with enough room to expand an existing business which is currently located on another site.

- (d) Either:

(i) The applicant has incorporated other design measures that exceed the minimums of the district and compensate for non-compliance with the requirements to be waived (net beneficial effect); OR

(ii) The strict application of the provisions of the regulation would deprive the applicant of the reasonable use of the land or would create an unnecessary hardship on the applicant.

STAFF: Strict application of the provisions of the regulation would deprive the applicant of the reasonable use of the land or would create an unnecessary hardship on the applicant because the constraints of the site require an encroachment and the lower-impact use of the site (a building wall) will be facing the most affected adjoining property.

### **STANDARD OF REVIEW AND STAFF ANALYSIS FOR VARIANCE FROM TABLE 5.3.2**

- (a) The requested variance will not adversely affect the public health, safety or welfare.

STAFF: The requested variance will not adversely affect the public health, safety or welfare as the encroachment will not affect sight lines or create a safety issue.

- (b) The requested variance will not alter the essential character of the general vicinity.

STAFF: The requested variance will not alter the essential character of the general vicinity as the provided setback is within a required Landscape Buffer Area and will be landscaped appropriately.

- (c) The requested variance will not cause a hazard or nuisance to the public.

STAFF: The requested variance will not cause a hazard or nuisance to the public as the encroachment does not place the building so close to the adjoining building as to create a hazard or nuisance.

- (d) The requested variance will not allow an unreasonable circumvention of the zoning regulations.

STAFF: The requested variance will not allow an unreasonable circumvention of the zoning regulations as the site constraints require the building to encroach into the required setback.

#### ADDITIONAL CONSIDERATIONS:

1. The requested variance does not arise from special circumstances which do not generally apply to land in the general vicinity or the same zone.

STAFF: The requested variance does not arise from special circumstances which do not generally apply to land in the general vicinity or the same zone because the lot is regular in shape and when consolidated would be twice the size of other lots in the vicinity.

2. The strict application of the provisions of the regulation would deprive the applicant of the reasonable use of the land or create an unnecessary hardship on the applicant.

STAFF: The strict application of the provisions of the regulation would create an unnecessary hardship on the applicant by requiring the applicant to reduce the size of the proposed building which would reduce the ability of the business to expand in the way it needs to expand.

3. The circumstances are not the result of actions of the applicant taken subsequent to the adoption of the zoning regulation from which relief is sought.

STAFF: The circumstances are not the result of actions of the applicant taken subsequent to the adoption of the zoning regulation from which relief is sought as the applicant is requesting the variance and has not begun construction.

#### STANDARD OF REVIEW AND STAFF ANALYSIS FOR VARIANCE FROM SECTION 5.1.12.B.2.e.i.1

- (a) The requested variance will not adversely affect the public health, safety or welfare.

STAFF: The requested variance will not adversely affect the public health, safety or welfare as the excess setback will not affect sight lines or create a safety issue.

- (b) The requested variance will not alter the essential character of the general vicinity.

STAFF: The requested variance will not alter the essential character of the general vicinity as the site is a corner lot which is to be developed with an office use, as opposed to the residential uses nearby, and therefore would be expected to be somewhat different from the residential development.

- (c) The requested variance will not cause a hazard or nuisance to the public.

STAFF: The requested variance will not cause a hazard or nuisance to the public as the structure will be built according to building code including all fire codes.

- (d) The requested variance will not allow an unreasonable circumvention of the zoning regulations.

STAFF: The requested variance will not allow an unreasonable circumvention of the zoning regulations as the vehicular maneuvering area in front of the building necessitates the excess setback.

#### ADDITIONAL CONSIDERATIONS:

1. The requested variance does not arise from special circumstances which do not generally apply to land in the general vicinity or the same zone.

STAFF: The requested variance does not arise from special circumstances which do not generally apply to land in the general vicinity or the same zone because the lot is regular in shape and when consolidated would be twice the size of other lots in the vicinity.

2. The strict application of the provisions of the regulation would deprive the applicant of the reasonable use of the land or create an unnecessary hardship on the applicant.

STAFF: The strict application of the provisions of the regulation would create an unnecessary hardship on the applicant by requiring the applicant to rearrange the orientation of the structures and parking on the lot.

3. The circumstances are not the result of actions of the applicant taken subsequent to the adoption of the zoning regulation from which relief is sought.

STAFF: The circumstances are not the result of actions of the applicant taken subsequent to the adoption of the zoning regulation from which relief is sought as the applicant is requesting the variance and has not begun construction.

#### STANDARD OF REVIEW AND STAFF ANALYSIS FOR DDDP

- (a) The conservation of natural resources on the property proposed for development, including: trees and other living vegetation, steep slopes, water courses, flood plains, soils, air quality, scenic views, and historic sites;

STAFF: No natural resources appear to exist on the site. The existing building is not proposed to be retained. However, the existing building does not appear to be a historic site.

- (b) The provisions for safe and efficient vehicular and pedestrian transportation both within the development and the community;

STAFF: Provisions for safe and efficient vehicular and pedestrian transportation within and around the development and the community has been provided, and Metro Public Works has approved the preliminary development plan.

- (c) The provision of sufficient open space (scenic and recreational) to meet the needs of the proposed development;

STAFF: There are no open space requirements pertinent to the current proposal.

- (d) The provision of adequate drainage facilities on the subject site in order to prevent drainage problems from occurring on the subject site or within the community;

STAFF: The Metropolitan Sewer District has approved the preliminary development plan and will ensure the provision of adequate drainage facilities on the subject site in order to prevent drainage problems from occurring on the subject site or within the community.

- (e) The compatibility of the overall site design (location of buildings, parking lots, screening, landscaping) and land use or uses with the existing and projected future development of the area;

STAFF: The overall site design is compatible with the existing and future development of the area. The site is a corner lot proposed for office development in proximity to an existing neighborhood. The site proposal would provide a small, neighborhood-serving office use.

- (f) Conformance of the development plan with the Comprehensive Plan and Land Development Code. Revised plan certain development plans shall be evaluated for conformance with the non-residential and mixed-use intent of the form districts and comprehensive plan.

STAFF: The development plan conforms to applicable guidelines and policies of the Comprehensive Plan and the regulations of the Land Development Code, with the exception of the requested waiver and variances.

**REQUIRED ACTIONS**

- **RECOMMEND** that Metro Council **APPROVE** or **DENY** the **Change-in-Zoning** from R-5 to OR
- **APPROVE** or **DENY** the **Waiver**
- **APPROVE** or **DENY** the **Variances**
- **APPROVE** or **DENY** the **Detailed District Development Plan** with **Binding Elements**

**NOTIFICATION**

Date	Purpose of Notice	Recipients

- NA Not Applicable

#### Neighborhood: Non-Residential

#	Plan 2040 Plan Element	Land Use & Development Policy	Staff Finding	Staff Analysis
1	Community Form: Goal 1	<p>6. Discourage non-residential expansion into existing residential areas unless applicant can demonstrate that any adverse impact on residential uses will be mitigated. Evaluation of impacts may include, but not be limited to, displacement of residents, loss of affordable housing units, traffic, parking, signs, lighting, noise, odor, and stormwater. Appropriate transitions from non-residential to residential uses should depend on the pattern of development of the Form District and may include natural vegetative buffers, landscaping or the use of higher density residential between lower density residential and/or non-residential.</p>	✓	The proposal would constitute a non-residential expansion into an existing residential area. The site is located along a minor arterial (Westport Road) and most traffic to the site will come via Westport Road. The proposal is for office/residential zoning which allows relatively low-impact uses which are unlikely to create an adverse impact on neighboring residential uses.
2	Community Form: Goal 1	<p>7. Locate higher density and intensity uses near major transportation facilities and transit corridors, employment centers, in or near activity centers and other areas where demand and adequate infrastructure exists or is planned.</p>	✓	The site is located adjacent to Westport Road, a transit corridor.
3	Community Form: Goal 1	<p>8. Encourage industries to locate in workplace Form Districts or in areas readily served by infrastructure and transportation facilities, including transit, rather than isolated industrial sites.</p>	NA	The proposal is not for industrial zoning.
4	Community Form: Goal 1	<p>15. When reviewing proposals for siting hazardous uses and uses with air, noise and light emissions, ensure disadvantaged populations are not disproportionately impacted.</p>	✓	The proposed zoning district would not permit hazardous uses. Disadvantaged populations are not disproportionately impacted by the proposal.

#	Plan 2040 Plan Element	Land Use & Development Policy	Staff Finding	Staff Analysis
5	Community Form: Goal 1	16. Consider impacts on human health, quality of life and the environment including prevailing meteorological conditions and the potential to transport noxious odors, particulates and emissions when reviewing new developments and redevelopments. Special attention should be paid to air and water quality when residences, schools, parks or vulnerable populations will be impacted. Mitigate impacts to areas that are disproportionately affected.	✓	The proposed zoning district would not permit uses which create noxious odors, particulates or emissions.
6	Community Form: Goal 1	17. Mitigate adverse impacts of traffic from proposed development on nearby existing communities.	✓	The site is located on Westport Road and most traffic to the site will be routed along Westport Road.
7	Community Form: Goal 1	18. Mitigate adverse impacts of noise from proposed development on existing communities.	✓	The proposed zoning district would not permit uses which are likely to create high levels of noise.
8	Community Form: Goal 1	21. Require that industries which handle hazardous or flammable materials or are potentially offensive such as junkyards, landfills and quarries are sited to protect public health, safety and welfare and are located away from residential areas and population centers.	NA	The proposal is not for industrial zoning and the proposed zoning district would not permit uses such as junkyards, landfills and quarries.
9	Community Form: Goal 2	1. Locate activity centers in appropriate areas in all Form Districts. Design and density should be compatible with desired form, adjacent uses, and existing and planned infrastructure.	✓	OR zoning is appropriate for a small corner activity center in an existing neighborhood. Westport Road is a minor arterial at this location.
10	Community Form: Goal 2	4. Allow non-residential development within the Neighborhood, Traditional Neighborhood and Village Form Districts to occur only at locations with appropriate access and connectivity.	✓	The site has appropriate access and connectivity, as it is located on Westport Road and most of the traffic to the site will be routed along Westport Road.
11	Community Form: Goal 2	5. Locate retail commercial development in activity centers where it can be demonstrated that sufficient population exists or is anticipated to support it.	✓	The site is not located in an existing activity center. Low-intensity commercial previously existed on a portion of the site and was supported by nearby populations.
12	Community Form: Goal 2	6. Encourage a more compact development pattern in activity centers that result in efficient land use and cost-effective infrastructure investment.	✓	The proposal would create a new activity center. OR zoning would support neighborhood-serving office uses, which encourages a more compact development pattern and cost-effective infrastructure investment.

#	Plan 2040 Plan Element	Land Use & Development Policy	Staff Finding	Staff Analysis
13	Community Form: Goal 2	7. Encourage activity centers to include a mixture of compatible land uses in order to reduce traffic congestion by requiring fewer trips, support and enhance alternative modes of travel, and encourage vitality and a sense of place.	✓	The proposal would permit a mixture of compatible land uses in a new activity center.
14	Community Form: Goal 2	8. Encourage residential land uses in designated centers. Encourage residential and office uses above retail and other mixed-use multi-story retail buildings.	✓	The proposal would permit residential uses in a new activity center.
15	Community Form: Goal 2	9. Encourage new developments and rehabilitation of buildings that provide commercial, office and/or residential uses.	✓	The proposed zoning district would encourage new development providing office uses.
16	Community Form: Goal 2	10. Encourage outlot development in underutilized parking lots of existing development to promote utilization of existing infrastructure provided specific criteria for elements such as location, scale, signs, parking, lighting, and landscaping are met. Outlot development shall encourage street-level retail with residential units above.	✓	The proposal would not include any underutilized parking lots.
17	Community Form: Goal 2	11. Ensure appropriate placement, design and scale of centers in Traditional Neighborhood, Neighborhood and Village Form Districts to ensure compatibility with nearby residences.	✓	The placement of the structure would be compatible with nearby residences.
18	Community Form: Goal 3	9. Encourage development that respects the natural features of the site through sensitive site design, avoids substantial changes to the topography, and minimizes property damage and environmental degradation resulting from disturbance of natural systems.	✓	No natural systems are evident on the subject site.
19	Community Form: Goal 3	10. Encourage development to avoid wet or highly permeable soils, severe, steep or unstable slopes where the potential for severe erosion problems exists in order to prevent property damage and public costs associated with soil slippage and foundation failure and to minimize environmental degradation.	✓	No wet or highly permeable soils, or severe, steep or unstable slopes are evident on the site.

#	Plan 2040 Plan Element	Land Use & Development Policy	Staff Finding	Staff Analysis
20	Community Form: Goal 3	11. Encourage land uses within the Ohio River Corridor that are appropriate for and related to river corridor activities and that are consistent with the goals and objectives of the Ohio River Corridor Master Plan. Reserve appropriate riverfront sites such as the Upper River Road industrial area for river-related development. Allow development of commercial leisure businesses related to the river, such as boating services and restaurants in appropriate locations. Encourage new development in the Ohio River corridor and along key greenway and street connections to provide for public access in new riverfront development and to maintain views of the river from public rights-of-way.	NA	The site is not located within the Ohio River Corridor.
21	Community Form: Goal 3	12. When reviewing proposed developments consider changes to flood-prone areas and other features vulnerable to natural disasters such as sinkholes and landslides. Ensure appropriate measures to protect health, safety and welfare of future users of the development.	✓	The site is not located in a flood-prone area. No karst features were evident on the site.
22	Community Form: Goal 4	1. Preserve buildings, sites, districts and landscapes that are recognized as having historic or architectural value and ensure that new land uses are compatible in height, massing, scale, architecture style and placement when located within the impact area of such resources.	✓	The existing structures on the site are not proposed to be preserved. They do not appear to have historic or architectural value.
23	Community Form: Goal 4	2. Encourage preservation of distinctive cultural features including landscapes, natural elements and built features.	✓	The existing structures on the site are not proposed to be preserved. They do not appear to constitute distinctive cultural features.
24	Mobility: Goal 1	4. Encourage higher densities and intensities within or near existing marketplace corridors, existing and future activity centers, and employment centers to support transit-oriented development and an efficient public transportation system.	✓	The site is not located within or near an existing marketplace corridor or existing activity center. However, Westport Road is a transit corridor at this location and development on this site would support transit-oriented development.
25	Mobility: Goal 2	4. Avoid access to development through areas of significantly lower intensity or density development if such access would create significant nuisances.	✓	Access to the site will be via Westport Road, a minor arterial and transit corridor at this location.

#	Plan 2040 Plan Element	Land Use & Development Policy	Staff Finding	Staff Analysis
26	Mobility: Goal 3	1. Encourage a mix of complementary neighborhood serving businesses and services in neighborhood and village centers to encourage short trips easily made by walking or bicycling.	✓	OR zoning would permit neighborhood-serving office uses.
27	Mobility: Goal 3	2. To improve mobility, and reduce vehicle miles traveled and congestion, encourage a mixture of compatible land uses that are easily accessible by bicycle, car, transit, pedestrians and people with disabilities. Housing should be encouraged near employment centers.	✓	The proposal would permit a mixture of compatible land uses that are easily accessible by bicycle, car, transit, pedestrians and people with disabilities.
28	Mobility: Goal 3	3. Evaluate developments for their ability to promote public transit and pedestrian use. Encourage higher density mixed-use developments that reduce the need for multiple automobile trips as a means of achieving air quality standards and providing transportation and housing choices.	✓	The site is located on an existing transit corridor and the proposal would encourage higher density mixed-use developments.
29	Mobility: Goal 3	4. Encourage development of walkable centers to connect different modes of travel. Siting of these multi-modal centers shall consider the effects of the following: 4.1. nodal connections identified by Move Louisville; 4.2. impact on freight routes; 4.3. time of operation of facilities; 4.4. safety; 4.5. appropriate linkages between neighborhoods and employment; and 4.6. the potential for reducing travel times and vehicle miles traveled.	✓	Transportation Planning has approved the proposal.
30	Mobility: Goal 3	5. Evaluate developments for their impact on the transportation network (including the street, pedestrian, transit, freight movement and bike facilities and services) and air quality.	✓	Transportation Planning has approved the proposal.
31	Mobility: Goal 3	6. Ensure that those who propose new developments bear or share in rough proportionality the costs of transportation facilities and services made necessary by development.	✓	Transportation Planning has approved the proposal.

#	Plan 2040 Plan Element	Land Use & Development Policy	Staff Finding	Staff Analysis
32	Mobility: Goal 3	9. When existing transportation facilities and services are inadequate and public funds are not available to rectify the situation, the developer may be asked to make improvements, roughly proportional to the projected impact of the proposed development, to eliminate present inadequacies if such improvements would be the only means by which the development would be considered appropriate at the proposed location.	✓	Transportation Planning has approved the proposal.
33	Mobility: Goal 3	10. Ensure that necessary improvements occur in accordance with long-range transportation plans and level of mobility criteria for all modes of travel.	✓	Transportation Planning has approved the proposal.
34	Community Facilities: Goal 2	1. Locate development in areas served by existing utilities or capable of being served by public or private utility extensions.	✓	The relevant utilities have approved the proposal.
35	Community Facilities: Goal 2	2. Ensure that all development has an adequate supply of potable water and water for fire-fighting purposes. Locate only very low-density land uses on sites that use on-lot sewage disposal systems or on a private supply of potable water.	✓	Louisville Water Company has approved the proposal.
36	Community Facilities: Goal 2	3. Ensure that all development has adequate means of sewage treatment and disposal to protect public health and to protect water quality in lakes and streams as determined by the Metropolitan Sewer District (MSD).	✓	MSD has approved the proposal.
37	Economic Development: Goal 1	2. Encourage industries, to the extent possible, to locate in industrial subdivisions or adjacent to an existing industry to take advantage of special infrastructure needs.	NA	The proposal is not for industrial zoning.
38	Economic Development: Goal 1	3. Locate commercial uses generating high volumes of traffic on a major arterial street, at the intersection of two minor arterials, or at a location with adequate access to a major arterial and at locations where nuisances and activities of the proposed use will not adversely affect adjacent areas.	✓	The site is located on a minor arterial street and does not have adequate access to a major arterial. The proposed zoning district would not allow uses likely to generate high volumes of traffic.

#	Plan 2040 Plan Element	Land Use & Development Policy	Staff Finding	Staff Analysis
39	Economic Development: Goal 1	4. Utilize industrial sites near the airport and the Ohio River to support the growth and development of uses whose infrastructure and production needs require such a location or for land uses that support airport-oriented or river-oriented industrial uses.	NA	The proposal is not for industrial zoning. The site is not located near the airport or the Ohio River.
40	Economic Development: Goal 1	5. Require industrial developments to locate with the appropriate transportation connectivity, near an arterial street or within existing industrial subdivisions.	NA	The proposal is not for industrial zoning.
41	Livability: Goal 1	17. Determine site susceptibility to erosion; identify the presence of on-site carbonate conditions and features that are vulnerable to site disturbance; identify the extent of existing groundwater use and the impacts of the project on groundwater resources, flow patterns, and existing and proposed surface drainage. Then mitigate potential hazards to such systems resulting from the project.	✓	No karst features are evident on the subject site.
42	Livability: Goal 1	21. Mitigate negative development impacts to the integrity of the regulatory floodplain by encouraging development patterns that minimize disturbance and consider the increased risk of more frequent flooding events.	NA	The site is not located in the regulatory floodplain.
43	Livability: Goal 1	24. Ensure, to the extent feasible, that critical facilities and those that store or use hazardous wastes are located outside the regulatory floodplain. Where essential community facilities must be located within a floodplain (e.g., pumping stations), ensure that these facilities are designed, located and operated in a manner that minimizes loss of services during flood events as well as limits, to the extent possible, floodplain disturbance.	NA	The site is not located in the regulatory floodplain.
44	Housing: Goal 1	2. Promote housing options and environments that support aging in place. Encourage housing for older adults and people with disabilities to be located close to shopping and transit routes and, when possible, medical and other supportive facilities.	✓	The proposal would support aging in place by permitting higher density housing options on the site, or neighborhood-serving office uses in proximity to existing residential development.

#	Plan 2040 Plan Element	Land Use & Development Policy	Staff Finding	Staff Analysis
45	Housing: Goal 2	1. Encourage inter-generational, mixed-income and mixed-use development that is connected to the neighborhood and surrounding area.	✓	The proposal would permit inter-generational mixed-income and mixed-use development. The site is connected to the neighborhood and surrounding area.
46	Housing: Goal 2	2. Locate housing within proximity to multi-modal transportation corridors providing safe and convenient access to employment opportunities, as well as within proximity to amenities providing neighborhood goods and services. Higher density, accessible residential uses should be located along transit corridors and in or near activity centers.	✓	The proposal would permit housing in proximity to Westport Road, a multi-modal transportation corridor.
47	Housing: Goal 3	2. As neighborhoods evolve, discourage displacement of existing residents from their community.	-	Existing residents may be displaced from the site as the result of demolition of the existing house.
48	Housing: Goal 3	3. Encourage the use of innovative methods such as clustering, mixed-use developments, co-housing, and accessory apartments to increase the production of fair and affordable housing.	✓	The proposal would permit innovative methods of housing.

#### 4. Proposed Binding Elements

1. The development shall be in accordance with the approved district development plan, all applicable sections of the Land Development Code (LDC) and agreed upon binding elements unless amended pursuant to the Land Development Code. Any changes/additions/alterations of any binding element(s) shall be submitted to the Planning Commission or the Planning Commission's designee for review and approval; any changes/additions/alterations not so referred shall not be valid.
2. No outdoor advertising signs, small freestanding signs, pennants, balloons, or banners shall be permitted on the site.
3. Construction fencing shall be erected when off-site trees or tree canopy exists within 3' of a common property line. Fencing shall be in place prior to any grading or construction to protect the existing root systems from compaction. The fencing shall enclose the entire area beneath the tree canopy and shall remain in place until all construction is completed. No parking, material storage or construction activities are permitted within the protected area.
4. Before any permit (including but not limited to building, parking lot, change of use, site disturbance, alteration permit or demolition permit) is requested:
  - a. The development plan must receive full construction approval from Construction Review, Louisville Metro Public Works and the Metropolitan Sewer District.

- b. Encroachment permits must be obtained from the Kentucky Transportation Cabinet for any work in the Westport Road right-of-way.
  - c. The property owner/developer must obtain approval of a detailed plan for screening (buffering/landscaping) as described in Chapter 10 prior to requesting a certificate of occupancy. Such plan shall be implemented prior to occupancy of the site and shall be maintained thereafter.
  - d. A Tree Preservation Plan in accordance with Chapter 10 of the LDC shall be reviewed and approved prior to obtaining approval for site disturbance.
  - e. A minor plat or legal instrument shall be recorded consolidating the property into one lot. A copy of the recorded instrument shall be submitted to the Division of Planning and Design Services; transmittal of the approved plans to the office responsible for permit issuance will occur only after receipt of said instrument.
  - f. The materials and design of proposed structures shall be substantially the same as depicted in the rendering as presented at the February 17, 2022 Planning Commission meeting. A copy of the approved rendering is available in the case file on record in the offices of the Louisville Metro Planning Commission.
5. A certificate of occupancy must be received from the appropriate code enforcement department prior to occupancy of the structure or land for the proposed use. All binding elements requiring action and approval must be implemented prior to requesting issuance of the certificate of occupancy, unless specifically waived by the Planning Commission.
  6. There shall be no outdoor music (live, piped, radio or amplified) or outdoor entertainment or outdoor PA system permitted on the site.
  7. The applicant, developer, or property owner shall provide copies of these binding elements to tenants, purchasers, contractors, subcontractors and other parties engaged in development of this site and shall advise them of the content of these binding elements. These binding elements shall run with the land and the owner of the property and occupant of the property shall at all times be responsible for compliance with these binding elements. At all times during development of the site, the applicant and developer, their heirs, successors; and assignees, contractors, subcontractors, and other parties engaged in development of the site, shall be responsible for compliance with these binding elements.
