Sponsorship has been withdrawn.

Chair Person Fox read the following statement on behalf of Councilman Piagentini regarding his withdrawal:

"Dear Public Safety Committee,

As many of you are aware, I have been working for months on an ordinance to require reporting on gun shots that are treated at local healthcare facilities to provide additional visibility to our public health and public safety apparatus on how many gunshot incidences are occurring in the city. Currently, our reporting is dependent on voluntary reporting so there is the risk of under-reporting of gun shot wounds in our city. We have had some anecdotal evidence that some cases have been under-reported which was the impetus for this legislation.

After months of work and research, we discovered that the state already aggregates this data on a quarterly basis from the hospitals across the state. After several meetings between the Kentucky Hospital Association, the State Cabinet of Health and Family Services, and our own Public Health department, we realized that we can get this information without using the legislative process. After a meeting earlier this week, Public Health is going to initiate the process with the state Cabinet and will start getting this data soon. From there, they will share what we agreed to with LMPD and we will see how that data will help identify discrepancies in our data.

I want to thank Public Health, the Hospital Association, and the Cabinet for working through this process. We will work collaboratively with Public Health and LMPD through this process but I am personally happy that we are able to accomplish the goal without initiating an unfunded mandate on our local healthcare system.

Due to this progress, I am withdrawing my sponsorship of my ordinance so it can die in Committee. Thank you for your time and I will update this committee once we see the fruits of the first data transfer.

Sincerely,  
Anthony Piagentini"
