Kip,

The attached provides the cost of each of the sizes of signs they had available. For there, I just used the cost of the 36" sign to develop the estimate.

Thank you,
Stacy

Out of curiosity, do you have any documentation about the cost of these we can/should attach to our appropriation request?

Subject: LED-enhanced signs

Stacy,

Thank you for working with us re: some safety concerns with the Goose Creek Road/Blossom Lane intersection. If I remember correctly, based off crash data going back to 2018, Public Works recommends two LED-enhanced signs for the Goose Creek Road approaches. Two 36" BlinkerStop signs would cost \$2,657.62 themselves with posts and such bringing the total to around \$3,000 (if you have estimates or anything else to reflect all that, please feel free to share). If I have that correct, would Public Works accept these funds from District 17 CIF for this purpose?

Subject: RE: LED enhanced stop signs and stop ahead signage

Kip,

I received pricing from our vendor. They don't have a 42" size in the BlinkerStop sign. Given that, I recommend using 36" BlinkerStop signs on each Goose Creek approach. The cost for the signs themselves is \$2,657.62. With posts and labor added \$3,000 should cover materials purchase and installation.

Thank you,
Stacy

Either way, could you give us some number we could use to get this included?

In case we don't get a perfect answer today, what amount would be a safe one to list in your opinion for two 42" signs?
