**Revised Detailed District Development Plan subject to binding elements**

00:39:35 On a motion by Commissioner Steff, seconded by Commissioner Lannert, the following resolution, based on the staff report, staff analysis, and the evidence and testimony heard today, was adopted:

**WHEREAS**, the Development Review Committee finds that there do not appear to be any historic resources on the subject site. Tree canopy requirements of the Land Development Code will be provided on the subject site. The site is adjacent to Weaver Run, a protected waterway, and because of this, the site is required to have a 100ft Protected Waterway buffer from the top of the bank. Since the existing maintenance building is encroaching into the stream buffer, the applicant has requested a Variance to permit both the existing structure and the additional maintenance garage to encroach into the Protected Waterway buffer and is scheduled to be heard at the Board of Zoning Adjustment meeting on May 18th, 2026, and

**WHEREAS**, the Development Review Committee finds that provisions for safe and efficient vehicular and pedestrian transportation within and around the development and the community has been provided, and Metro Public Works and the Kentucky Transportation Cabinet have approved the preliminary development plan, and

**WHEREAS**, the Development Review Committee finds that there are no open space requirements pertinent to the current proposal, and

**WHEREAS**, the Development Review Committee finds that the Metropolitan Sewer District has approved the preliminary development plan and will ensure the provision of adequate drainage facilities on the subject site in order to prevent drainage problems from occurring on the subject site or within the community, and

**WHEREAS**, the Development Review Committee finds the overall site design and land uses are compatible with the existing and future development of the area. Appropriate landscape buffering and screening will be provided to screen adjacent properties and roadways. Buildings and parking lots will meet all required setbacks. The proposed

development's overall site design is compatible with the Neighborhood Form District pattern of development, and

**WHEREAS**, the Development Review Committee finds that the development plan conforms to applicable guidelines and policies of the Comprehensive Plan and to requirements of the Land Development Code. Community Form Goal 1 Policy 4 states that the proposal ensures new development and redevelopment are compatible with the scale and site design of nearby existing development and with the desired pattern of development within the Form District. Quality design and building materials should be promoted to enhance compatibility of development and redevelopment projects. Community Form Goal 1 Policy 9 ensures an appropriate transition between uses that are substantially different in scale and intensity or density of development. The transition may be achieved through methods such as landscaped buffer yards, vegetative berms, compatible building design and materials, height restrictions and setback requirements. The development will maintain the landscape buffer areas required between industrial and residential development. Community Goal 1 Policy 11 ensures setbacks, lot dimensions and building heights are compatible with those of nearby developments that meet Form District guidelines.

In addition to the Comprehensive Plan, the development plan conforms to applicable guidelines and policies of the South Dixie Highway Master Plan (2018). Overall Goal 2 intends to support good land use decisions that provide positive impacts and investment. Goal 5 creates a plan that coordinates with existing plans and future projects. The proposed addition to the existing industrial site provides further investment within the South Dixie Highway neighborhood which provides a positive impact on the community, now, therefore be it.

**RESOLVED**, that the Louisville Metro Development Review Committee does hereby **APPROVE** the Revised Detailed District Development Plan **SUBJECT** to the following revised Binding Elements:

1. The development shall be in accordance with the approved district development plan, all applicable sections of the Land Development Code (LDC) and agreed upon binding elements unless amended pursuant to the Land Development Code. Any changes/additions/alterations of any binding element(s) shall be submitted to the Planning Commission or the Planning Commission's designee for review and approval; any changes/additions/alterations not so referred shall not be valid.

2. Except for security lighting affixed to buildings on site, there shall be no outdoor lighting permitted on site.
3. Construction fencing shall be erected when off-site tree canopy exists within 3' of a common property line. Fencing shall be in place prior to any grading or construction to protect the existing root systems from compaction. The fencing shall enclose the entire area beneath the tree canopy and shall remain in place until all construction is completed. No parking, material storage, or construction activities shall be permitted within the fenced area.
4. Before a building or alteration permit and/or a certificate of occupancy is requested:
  - a. The development plan must be re-approved by the Louisville Metro Public Works and the Metropolitan Sewer District.
  - b. The property owner/developer must obtain approval of a detailed plan for screening (buffering/landscaping) as described in Chapter 10 of the Land Development Code. Such plan shall be implemented prior to requesting a certificate of occupancy and maintained thereafter.
5. A certificate of occupancy must be received from the appropriate code enforcement office prior to occupancy of the structure or land for the proposed use. All binding elements requiring action and approval must be implemented prior to requesting issuance of the certificate of occupancy, unless specifically waived by the Planning Commission.
