RE: 15ZONE 1050; Bradford Mill

Planning Commission,

Our neighborhood association supports the above referenced case, and make clear our excitement of our soon seeing what has been underutilized major buildings upgraded and modernized for full use. In recent years there have been numerous projects completed throughout Louisville that have allowed once major facilities to become successfully re-established for new uses. The most recent is one very close by to this project. It is the Germantown Mill Lofts which will be opening soon. In representing residents I can assure each member here how pleased the association is to see our neighborhood area grow not once but twice in this manner. Finally, I note that the developers are local and well respected.

Sincerely
Judy Magre
President
