Stuarts original estimate of \$200.00 is accurate. We only need a cost / billing center and written agreement (email response) that you do agree to reimburse us before we create a work order and get this thing rolling. Once those needs are satisfied, it would be @ 30 days to have all work completed. Thanks again

Derek,

Please provide Council's office with a cost estimate to fabricate and install one directional sign with brown background and white text on the power pole shown on the attachment.

Thanks,

Angela,

Attached you will find LMPW's proposed plan for the Turkey Run Park directional sign on Broad Run Rd. Our proposal includes moving the sign closer to the entrance to improve effectiveness. Once we receive approval from your office regarding location, we will develop a cost estimate for the project and forward that to your office for final project approval. At that time, we will schedule fabrication and installation.

Derek,

This is just an FYI for something that will be coming up soon.

Thanks,

Anna,

We just discovered that the location on Seatonville Road where you want a sign and unfortunately it falls on the portion of Seatonville that is maintained by the state so you will have to go through them to get a sign placed there.

Was there another place you had in mind?
