Notice
The Architect/Engineer does not warrant the scope of professional service, including a permit application, or whether any stated permitting system used which excludes disciplines is under the purview of the Architect/Engineer's competence, and is not intended to define a professional's scope of work. Construction regarding individual trades, including but not limited to electrical, plumbing, mechanical, and other trades, shall be the responsibility of the contractor. The contractor shall obtain and provide the complete set of drawings and specifications when preparing bids, prices, and conditions.

Notice
The Architect's professional opinion does not define the structural capacity, or structural steel member performance, or fabric used within structural steel members. Information regarding structural steel members, including steel grades, material properties, and intended use, shall be obtained from the manufacturer. The Architect is not responsible for the structural design of the building. The Contractor shall be responsible for the design and construction of the building and shall provide the complete set of drawings and specifications, including structural steel, concrete, and masonry.
