

## BIODIGESTER STATEMENT:

---

*On Behalf of Councilman David James, District 6*

### **Metro Council Meeting- September 8, 2016**

As I have shared so many times past, “I am pro technology; however, I am extremely concerned about the anaerobic digester in densely populated areas.” The constituents that we all represent in Metro Government deserve to live in neighborhoods with minimal environmental health concerns. I would appreciate and encourage to all my colleagues support the 1 mile distance to pass this ordinance. Thank you so very much!
