Subject:

FW: O-278-16 Amended Ordinance on Biodigester Regulations 16AMEND1007 -- one mile no waiver

Colleagues,

If you heard my remarks from the committee meeting last week, you know that I am greatly opposed to a bio digester going into the landfill. I urged the committee to add the airport to the list which they did as an amendment. We certainly don't need the possibility of chemical explosion or spill near the airport, UPS or FORD which all are nestled near the landfill.

My constituents are burdened with lots of nuisances in our district. We have constant garbage trucks dropping garbage on the roads along the way to the landfill, scrapping materials being dropped on our roads, airplane noise throughout the night along with vibrations in our households, and excessively long train wait times usually during rush hours. We also have strong noxious odors from the landfill. We do not need more bad odors, more trucks and more garbage on our roads from Biodigesters.

Please use this in the record if possible tonight since I can't be at Council Mtg due to family obligations. Thank you,

Vicki Aubrey Welch
