

metro council speech May 14 2016

Metro Council speech  
for 5-14-16  
Speaker Carolyn Jones  
Louisville city resident

Good evening councilman,

I am Carolyn Jones, please note  
this statement for the record.

Last I spoken here there was a comment made after my  
speech, saying

that some folk come to this potieum to put on acts.  
I felt statement was directed towards me or to smother  
my message.

unless he did not hear my cry out that I am stuck suffering  
with grave risk injuries due to dentist Nandaka Jayweera  
mistake of dropping fillings down my throat during a precidure

I am suffering with chest lodged several swollen lymphnodes  
and brusis under each armpit imflammation build  
and more."with that said"

victoms do not put on acts we scream out to our local authorities  
and officials to do the positive thing.  
how can we exspect possitive  
results when negative is being  
is being allowed to stand out

please taken in to consideration that Im fighting for my life  
while the wrong doers are fighting for there reputation  
mean while I suffer.

Im in need of treatment for my injuries, while same time  
Dr's have insurance to cover there mistakes.

Im praying my City officials do not become a part of this  
inhumane treatment by ignoring and allowing  
such atrocities without investigation  
or demanding I recieve remedy for treatment

please take this matter into concideration that this is not an  
out of mind out of public eye issue.  
as community awiats the out come of this matter.

notice I did,

I did try confrencing with dentist before matter got as far as court.

I did and still is trying to seek for lawyer  
with not one willing to take this case.

I did wait as far and legal as posible before I had no choice but  
to open to save my life/case as I am continously seaking for lawyer  
still today with not one wanting this case.

I did provide a noterized medical exspert opions signature

metro council speech May 14 2016

I did provide medical records as well as notes and pure proof of entire with more evidence then the law allows.

Recall that on February 4, 2011, a dentist dropped pieces of tooth-filings down my throat.  
Some of those pieces are still lodged in my chest.

I am tramatized in going to dentist  
as You can only vissually see my tooth, also  
skin iirretation that I am still affected from that dental  
accident from five years ago.but theres much more injuries.

I just don't see how we can solve "peace & justice problem" if we only look at part of it,  
while ignoring the other parts. I plea with you to demand the Kentucky Court of Appeals to rule in my case so that I can seek treatment,case # 2014-CA-1628.

~~can I please have all who hear and understand my matter to please  
stand in support of Justice on my matter.  
this torcher as Ive been suffering since Feb 2011~~

so I ask this council, Gov.Steve Bashear, Gov Matt Bevins Ky Law makers  
Frankfort Officials and all with jourishdiction over this matter  
I have a right to live  
please let me hear from you chobbs5367@yahoo.com

Thank you!
