I turned on the news and Louisville had an air quality alert, Louisville???? So I'm wondering how many acres green spaces are there in St. Matthews??

Next I get a postcard about zoning change for variance to reduce required open space for case 22 zone 0093/23 Variance 0053.

One of reasons to live in St. Matthews is the older growth trees, country (small town atmosphere), less traffic and better air quality.

Why even have rules, if no one abides by them?
I strongly oppose this development.

Sincerely,
