Here is the estimate for the services we talked about doing;

Brian,

Circling back to this. Not sure if I had previously sent over the estimate I received from Pidges on the plantings. I have attached it, but comes to \$5,280.

Please advise how you would like to proceed.

I took the homeowner off the message for the moment. What is the final aesthetic you want this wall to appear like? If the idea is to have the plantings cover the face of the wall, then I think that rubbing the wall with concrete is redundant and a waste of funding since it will eventually be covered. If you want the wall somewhat exposed, then we can get the contractor back out to remove bags and install concrete on the wall in order to have some additional aesthetic appeal. Please let me know what the desired look is, and you can submit funding for the contractor to rub the wall with concrete, or I can get with urban forestry about giving a quote for the plantings and installation which I believe will be significantly less than the contractor's quote. Either way, it will likely be best to wait until spring to have the final plan implemented.

The response for the paving of the roadway will be that we are currently having our roadways re-rated at this time. Based on those results a new 3 year plan will be developed to reflect these new ratings. I am not in a position at this time to say where St Anthony's Church Rd will fall on that plan until those PCI's come back. Also, as a side note, I have talked to LG&E who have indicated to me that a gas line needs to be replaced in which they are intending to complete work in 2021 (not sure if early or late 2021). So paving will be delayed until after this work is completed at the earliest.

Matthew,

The Clerk's office requests an email from Public Works that specifically states that the department will accept the \$5,280 for this beautification project. If you will please respond to this email in the affirmative, we will fund this project.

Thank you,

Brian Powell
