

**Discover what we're doing for
you...**

About Us

- Nationally unique
- State mandated cancer control program
- Established by the Kentucky General Assembly in 1982
- Jointly administered by the University of Louisville and the University of Kentucky

About Us

- Mission is to reduce cancer incidence and mortality through education, research, and service
- Cancer control specialists identify cancer problems, mobilize communities, and implement programs for cancer prevention, early detection and survivorship
- 13 regional offices
- 15 district cancer councils
