To Whom it may concern,

Please find the attached Modified Conditional Use Permit Application and Plan for the Kroger Kentucky Distribution Center at 2000 Nelson Miller Parkway. This modification is to show the updated location of a replacement Hydrogen Fuel Cell on site.

Since the previously approved Conditional Use Permit, the local fire department has requested that Kroger replace their existing hydrogen fuel operation with modern, safer equipment. In response, the current fuel cell farm is being decommissioned and a new Air Products hydrogen fuel cell is being constructed approximately 30' to the south east of the existing pad to serve the distribution center.

If you have any questions or concerns about these revisions, please contact me at 502-585-4181x1921 or by email at dhatcher@luckett-farley.com. The project engineer, Morgan Hawker, may be contacted at 502-585-4181x1736 or by email at mhawker@luckett-farley.com.

Best Regards,

Drew Hatcher, EIT
