STATEMENT OF COMPLIANCE WITH ALL APPLICABLE GUIDELINES AND POLICIES OF THE CORNERSTONE 2020 COMPREHENSIVE PLAN

Applicant: Ball Homes

Owner: Robertson Trust dated August 30, 2002

Location: 6707 Shaffer Lane

Proposed Use: Single-Family Residential

Engineers, Land Planners and
Landscape Architects: Mindel Scott & Associates

Request: Zone Change from R-4 to R-5

RECEIVED

DESIGN SERVICES

GUIDELINE 1 – COMMUNITY FORM

The subject property which is located in the Neighborhood Form Districts, is characterized by predominately residential uses from low to medium/high density and that blend compatibility into the existing landscape and neighborhood areas with the provision for open space and greenways setback. Pedestrian and bicycle accommodations should also be provided. This proposed R-5 subdivision is a relatively low density one which will result in only a very slight increase in lots compared to the R-4 zoning currently allowed. The site is planned with 80 residential lots versus approximately 66 which would be permitted under R-4. The applicant could have chosen the "alternative development incentives (ADI) regulation" or "conservation subdivision regulation", or it could've applied for "PRD" rezoning. But those regulations either require affordable components not appropriate for this location or are inappropriate based on other particular requirements of each of those regulations. Furthermore, R-5 is available, well-known, understood and easy to apply at this site, and there are other residential developments in the area that are zoned R-5, R-5A, or comparable.

GUIDELINE 3 – COMPATIBILITY

The proposed subdivision complies with all of the applicable Intents and Policies 1, 2, 3, 5, 6, 7, 8, 9, 10, 12, 14, 15, 16, 21, 22, 23 and 25 of Guideline 3 for these reasons.

This low density residential subdivision adds to the desired mixture of housing types, sizes and styles while still being design-compatible in terms of scale and building materials. The proposed subdivision does not involve any known nuisances, such as odors, noises, lighting, aesthetics or traffic different than what already exist in the greater area. Setbacks will include compatible side and rear yards, and the LDC tree canopy and landscape regulations will apply. Sidewalks are being added throughout most of the development and buffers are also being provided. The design of the homes is high quality and will value the homes consistently with the surrounding

18 ZONE 1009

residential areas. The detailed district development/preliminary subdivision plan (DDDP), neighborhood meeting PowerPoint and home design elevations filed with and to be later reviewed with this application demonstrate all that.

GUIDELINES 4 AND 5 – OPEN SPACE / NATURAL AREAS AND SCENIC AND HISTORIC RESOURCES

The proposed subdivision and its DDDP comply with all applicable Intents and Policies 1, 2, 5, 6, and 7 of Guideline 4 and Policy 1 of Guideline 5 for these reasons.

This standard single-family subdivision includes protected perimeter open space for detainage at Shaffer Lane and also will protect some natural resources and features, notably trees buffering the site where possible to assuring good transitions and buffers to neighboring properties. The homeowners association will maintain the open area.

GUIDELINE 6 – MARKETPLACE

The proposed subdivision complies with all of the applicable Intents and Policies 2, 5, and 11 of Guideline 6 for these reasons.

This land is surrounded by like-kind subdivisions. That makes it an infill single-family residential site, appropriate for the area in the larger community, where new single-family housing is in greatest demand.

GUIDELINE 7 AND 8 – CIRCULATION AND TRANSPORTATION FACILITY DESIGN; GUIDELINE 9 - BICYCLE, PEDESTRIAN AND TRANSIT; GUIDELINE 12 – AIR QUALITY

The proposed subdivision complies with all of the applicable Intents and Policies 1, 2, 4, 6, 9, 11, 13, 14, 15, 16, and 18 of Guideline 7; Policies 3, 5, 6, 7, 8, 9, 10 and 11 of Guideline 8; Policies 1, 3 and 4 of Guideline 9; and Policies 1, 2, 4, 6 and 8 of Guideline 12 for these reasons.

This subdivision is situated on a secondary collector street (Shaffer Lane) where sewer, water and other utilities already exist, and where road capacity exists. Further, this DDDP will be reviewed by Metro Transportation Planning and Public Works personnel, who must stamp the DDDP for approval prior to its docketing for Planning Commission review. That assures that all of these applicable Public Works standards are complied with, including regulatory standards of the Land Development Code (LDC).

In that regard, the proposed DDDP assures that both points of access into the proposed subdivision are designed to operate safely and, because of the distribution between these two streets to function at relatively low volumes, as neighborhood serving streets are expected to function. Thus, negative internal traffic impacts are avoided with this proposed subdivision. And, as noted, design of the site, as shown on the DDDP accompanying this application assures that corner clearances, driveway access, median openings, cross connections, etc. are provided as required. Possible road improvements along Shaffer Lane have yet to be determined, but some

PLANNING &
DESIGN SERVICES

may be required as impact mitigation measures. Any off-site roadway improvements will, of course, need to meet the “essential nexus” and “rough proportionality” test.

GUIDELINES 10 AND 11 – STORMWATER AND WATER QUALITY

The proposed DDDP complies with all applicable Intents and Policies 1, 3, 6, 7, 9, 10 and 11 of Guideline 10 and Policies 3 and 5 of Guideline 11 for these reasons.

MSD will require that post-development peak rates of storm water runoff do not exceed pre-development peak flows. That is accomplished through on-site detention. Thus, new impervious areas will not have a negative impact on existing storm water systems. Also, MSD will have to stamp for preliminary approval the DDDP before it is set for Planning Commission review. And at time of construction, the proposed subdivision will need to include water quality measures to address the new MSD water quality standards. Any new construction will have to comply with MSD's soil erosion and sediment control standards.

GUIDELINE 13 – LANDSCAPE CHARACTER

The proposed subdivision complies with the Intent and applicable Policies 1, 2, 4, 5 and 6 of Guideline 13 for these reasons.

The local LDC requires tree canopies, certain kinds of interior and perimeter landscaping. Accordingly, the LDC will be fully complied with, except as respects a parkway buffer setback encroachment on the proposed lot where the existing farm house exists today.

* * *

For all of these and other reasons set forth on the Detailed District Development Plan/preliminary subdivision plan accompanying this application and in accordance with evidence presented at Planning Commission public hearings, this application will comply with all other applicable Guidelines and Policies of the Cornerstone 2020 Comprehensive Plan.

Respectfully submitted,
