

NDF, CIF, MAP OR PAV INTERAGENCY CHECKLIST

Interagency Name:	Public Works & Assets
Program/Project Name:	Parking T's and No Stopping Signs
	Yes/No/NA
Request Form: Is the Request Signed by all Council Member(s) Appropriating Funding?	Yes
Request Form: If matching funds are to be used, are they disclosed with account numbers in the request form description?	No
Request Form: If matching funds are to be used, does the amount of the request exclude the matching fund amount?	NA
Request Form: If other funds are to be used for this project, are they disclosed with account numbers in the request form description?	NA
Funding Source: If CIF is being requested, does Metro Louisville own/will own the real estate, building or equipment? If not, the funding source is probably NDF.	Yes
Funding Source: If CIF is being requested, does the project have a useful life of more than one year? If not, the funding source is probably NDF.	Yes
Ordinance Required: Is the NDF request to a Metro Agency greater than \$5,000? If so, an ordinance is required.	NA
Ordinance Required: Is the request a transfer from NDF to cost center? If so, is the amount given for the fiscal year \$25,000 or less?	No
Supporting Documentation: Does the attachment include a valid estimate and description of cost?	Yes

You can add \$1,000 if you would like to include (4) No Stopping Anytime signs to be installed at the No Parking areas

The total project cost for the parking T's and No Stopping hatching for E Warnock St between Crittenden & Bradley is estimated at \$3,000. Public Works will accept these funds to complete the project sometime after Derby and while U of L is closed for Summer break. The markings will be completed in two phases so that parking is only restricted on one side of the street at a time.

Jeffrey Brown, PE

I created a rough estimate at the following per triangular section assuming each is 30' long:
4" exterior = \$0.75*43'
8" hatching = \$4.50*30'
Total per triangular section is approximately \$175

Jeff,

I would recommend 22' for interior spaces and 20' for exterior unless we have to go below that. I did a rough measurement of the south side (670') and we can get (2) exterior spaces at 20' and (26) interior spaces at 21.9'. The north side measures apx. 640' which leaves (2) exterior spaces at 20' and (25) interiors at 21.6' each. I believe we can perform a slight tweak to the plan by stating to have exterior spaces at 20' and equally space all interior spaces if you agree with my suggestion.

Kindly,

Subject: E Warnock St parking T's

CM Triplett is interested in funding a pilot project to designate on-street parking spaces using the parking T's and needs a cost estimate for the appropriation. I've sketched up a layout, and have the unit price for the parking T's, but need some help estimating the hatching markings. Can you guys estimate the hatching on the attached plan?
