

NDF022322PW15B

Louisville Metro Council City Agency Request

- Neighborhood Development Fund (NDF)
- Capital Infrastructure Fund (CIF)
- Municipal Aid Program (MAP)
- Paving Fund (PAV)

Primary Sponsor: Kevin Triplett**Amount:** \$628.00**Date:** January 26, 2022**Description of program/project including public purpose, additional funding sources, location of project/program and any external grantee(s):**

The request is for a new light installation at 413 Atwood Street. The funding will be used for a 5 year lease agreement with LG&E to provide lighting for residents in the area.

City Agency: Public Works & Assets**Contact Person:** Jeff Brown**Agency Phone:** 502-574-0065

I have reviewed this request for an expenditure of city tax dollars, and have determined the funds will be used for a public purpose and have the attached documentation from the receiving department concerning the project/expenditure.

Hi Jeff!

Councilman Triplett wants to fund this new light installment. Will Public Works accept the funds?

Subject: RE: Street Light

Least expensive would be \$10.47 per month with a minimum 5-Year lease so the total appropriation would be \$628.20

Subject: RE: Street Light

There's an existing wood pole so it can likely be placed but since this is a dead end street with VERY LOW traffic volume it likely wouldn't benefit much from a light other than residence comfort.

Subject: RE: Street Light

It looks like a regular street light request. We would need funding to add new street lights but property owners do have the option to lease LGE street lights at the same rate that Metro does. The yellow dots on the map are existing street lights on Atwood, sorry I couldn't get road names on there.

Hello, maybe your office can help me in regards to adding a new street light on my street. Specifically in front of the address of 413 Atwood St on an existing utility pole. Back in the spring I contacted Metro 311, public works and LG&E. Received a work order number, and never heard anything back. After a few months, I contacted Metro 311 to check the status. They had no record of a request being made. 311 then sent me over to public works where I was informed that LG&E needs to be contacted. Upon speaking with LG&E, they said that a request needs to be approved from Metro and Public works before said light would be installed on a city street. As you can tell, this turned into an endless loop where no one was able to give me any information or updates. Everyone I spoke with couldn't point me in the right direction to get this accomplished. At that point I contacted your office via voice-mail and once again I never heard anything back. At that point, I gave up out of frustration. The concern I and a few neighbors have and the reason we were wanting the additional street light, is that our street (Atwood) dead-ends into interstate 65 at 413 Atwood Street. The dead-end is very dark and at times on the states side on the states fence is overgrown. In the past we've had issues with homeless and others passing through Louisville setting up camp in these overgrown and dark areas. Recently, Metro or the state has added "no camping" signs to the interstate right of way and that seems to have helped with the folks setting up camp. However, the dead end of Atwood Street still remains dark and a safety hazard to residents. Is there anyway your office can see about adding a street light to the utility pole in front of 413 Atwood?

Thank you in advance for your assistance

Allen Warren
