

**Letter of Explanation  
for a Modified Conditional Use Permit and a Revised Detailed District  
Development Plan  
for Waste Management of Kentucky  
7501 Grade Lane  
Related Case: 16307**

The Applicant is submitting a Modified Conditional Use Permit and Revised Detailed District Development Plan to add 10 compressed natural gas (CNG) time fill refueling stations, add equipment to the existing equipment compound and to delineate 27 existing parking stalls as future CNG refueling stations. The area of the addition is developed and is currently used as a surplus parking and maneuvering area.

A Modified CUP and Revised Detailed District Development Plan was approved for case: 16307 on October 6, 2011 for the addition of the initial CNG refueling stations both time fill and retail pumps to the existing Waste Management site.

Please provide a staff level approval due to the minor nature of the proposed revisions.
