21-CD-0266

Please submit the completed application along with the following items:

Required for every application:

- ☒ Land Development Report¹
- ☐ Current photographs showing building front, specific project area, and surrounding buildings
- ☐ Elevations, pictures, samples, brochures, or other technical data describing materials, such as windows, doors, roofing, fencing, etc. to be used in the renovation or replacement

Site and Project plan: *(required for building additions, new structures and fencing)*

- ☒ Site plan drawn to scale with dimensions, as applies to the project, indicating property lines, structures, landscaping, fencing, and parking
- ☐ Floor plans drawn to scale with dimensions and each room labeled
- ☐ Elevation drawings (a drawing showing exterior walls) drawn to scale with dimensions.
For fencing, only photos/drawings of the proposed fence are required.

Committee Review Only

Committee reviews may be required due to the complexity of the case. The necessity of these items will be determined by staff upon review. Projects requiring committee level review include construction of new buildings, demolition, and projects that vary widely from design guidelines.

- ☐ Two sets of 11"x17" format site plans drawn to scale with dimensions
- ☐ Two sets of 11"x17" elevation drawings to scale with dimensions
- ☐ Two sets of 11"x17" landscaping drawings to scale with dimensions
- ☐ One set of mailing label sheets for: 1st tier Adjoining Property Owners (APOs)³, owners, applicants, contacts, and Case Manager. Applicant is responsible for mailing.
- ☐ One copy of the mailing label sheets

Resources:

1. For a Land Development Report, go to the following website and enter address in the search bar. After the map zooms to the location, click on the icon that looks like the letter "d" in a green circle. Print report.
<https://www.lojic.org/lojic-online>
2. Deeds and plats can be found at the Jefferson County Clerk's Office (527 West Jefferson Street , 2nd fl, 502-574-6220. Many deeds, plats and other records are available online at:

Definitions:

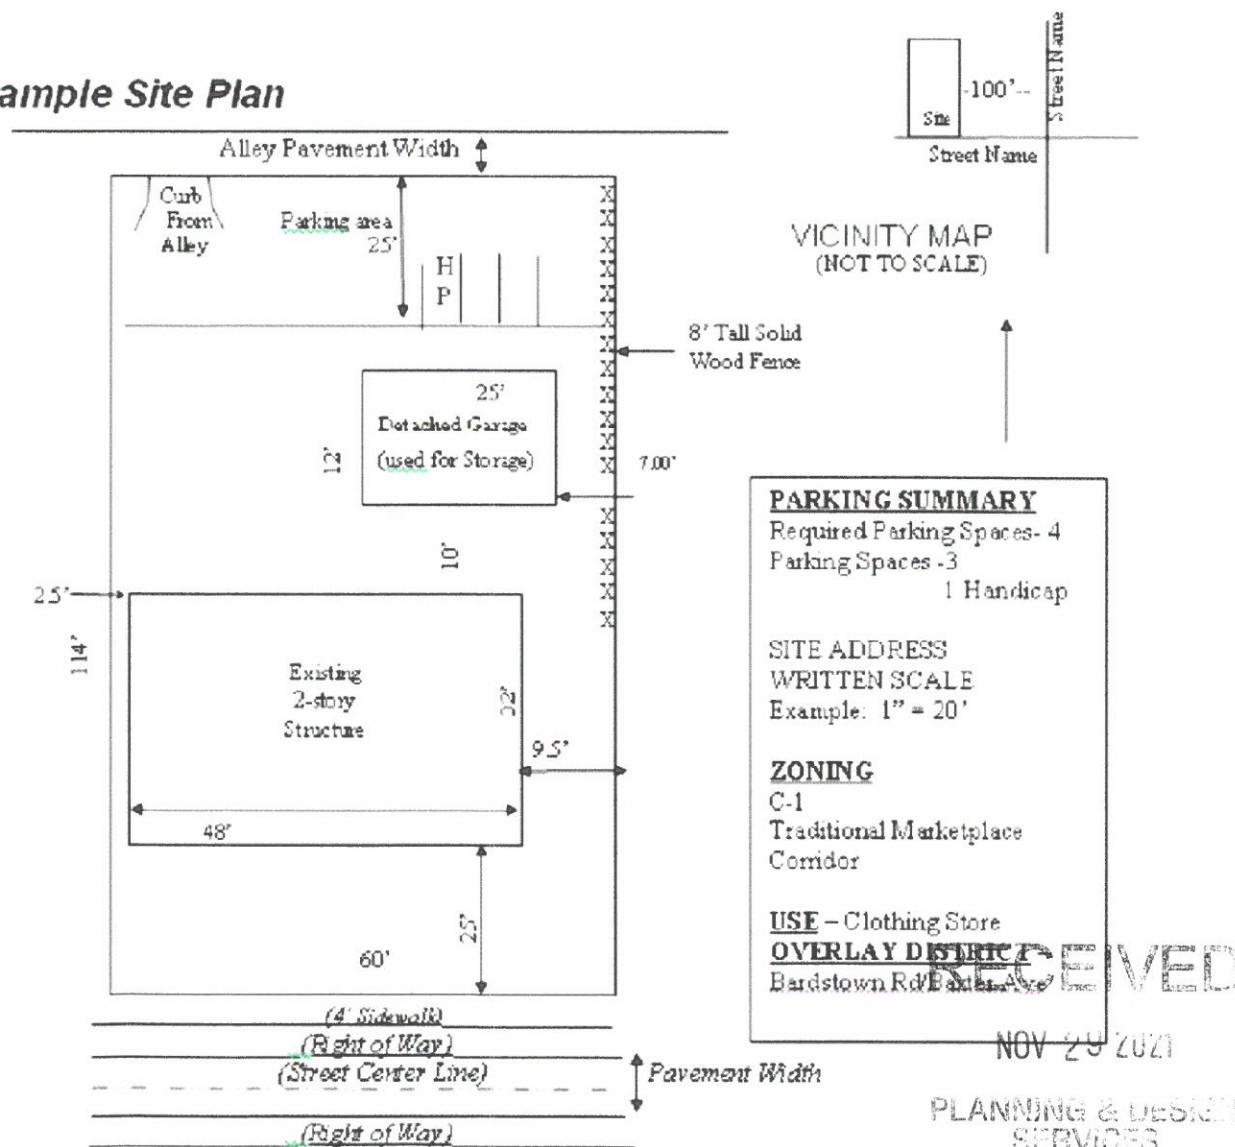

Certificate of Appropriateness: A project involving physical changes to the exterior of a building, structure, or property designated as a local landmark or located within a local preservation district shall require prior approval in the form of a Certificate of Appropriateness. An approval requires substantial conformance to design guidelines established for each landmark and district. The design guidelines, along with other information regarding local preservation districts, may be found at the website of the Landmarks and Preservation Districts Commission:

<https://louisvilleky.gov/government/planning-design/historic-preservation-landmarks-and-overlay-districts>

Overlay District Permit: A project involving physical changes to the exterior of a building, structure, or property within an overlay district shall require prior approval in the form of an Overlay Permit. An approval requires substantial conformance to design guidelines established for each overlay district. The design guidelines, along with other information regarding overlay districts, may be found at the following website:

<https://louisvilleky.gov/government/planning-design/historic-preservation-landmarks-and-overlay-districts>

Project description for 2130 New Main Street

This site is a residential lot, zoned R-6, containing one single family house. The house stands side wall to wall against the old post office building. This commercial building is called the Frankfort Crossings building, and its address is 2132 New Main Street. Applicant Jackie Green is the owner of both properties.

The proposal of this application is to demolish the house at 2130. Since the post office was built wall to wall against the house at 2130, the house has suffered from multiple problems related to water infiltration. The applicant will show that these problems are a direct result of how 2132 was built too close to the house at 2130. The proposal is to remove the walls and roof, but retain the brick foundation walls, and create a tiny landscaped park area with trees and seating. This new use for the site will serve as a buffer between the commercial use of the Frankfort Crossings building, and the residential neighbors on the other side of 2130.

- . Sanborn maps
- . Surveyor's map
- . Site Plan and Floor Plan

Images / photos

1. Image of 2130 from across the street
2. Image from under the front tree
3. Image from the back yard
4. Image from under the trees
5. Image of the west side
6. Image of the east side - note the proximity of the two structures 2132 and 2130, the lack of distance presents a maintenance problem for both buildings and deprives the neighborhood of a fitting transition between the commercial strip mall architecture and the residential structures to the west
7. More distant image of the east side of 2130 - note the expanse of surface parking lot in front of the USPS building (there is more of it than captured by the camera's eye), rain and melting snow from the surface parking lot flow west to the sidewalk and then down into the lower yard of 2130
8. 'Bird's eye view' (sparrow standing on the sidewalk) from the front gate of 2130, looking east - note the elevated parking lot, verge and street, all flow down onto the sidewalk
9. Image of 2130's front gate with the higher street visible beyond the verge - there are two steps down from the New Main sidewalk to the 2130 walkway running perpendicular from the street, down step the pedestrians, down flows the runoff
10. Another 'bird's eye view' looking uphill to the front gate
11. Image of the walkway at the front door - note the hole adjacent the walkway where the front yard is sinking
12. Image looking perpendicular from the 2130 walkway (looking parallel with the street) up to the fence bordering the USPS building's elevated parking lot - note the 1.5' difference in elevation between the USPS parking lot and the yard of 2130
13. Image from the front gate looking back at the yard sinking below the parking lot
14. Three images of the studs of the front (north) wall of the shotgun, completely rotted thru, the plate rotted, dusted and blown or washed away, the bricks in the third image are supporting the floor joists, while water continues to move downhill toward the joists, they are no longer wet due to their current elevation and the flow of air helping keep the humidity down
15. Image of distance between 2130 and 2132 - there is no way to maintain either wall - taken from the south east corner of shotgun
16. Three images of the west wall of the USPS building above the roof of 2130 - the missing brick and the mortar gaps have been filled in but the unknown cause of the shifting/sinking wall is unknown due to the proximity of the two structures, the USPS wall and foundation require
