**SUBJECT: Follow Up to Karst Survey
Hurstbourne Point
Watterson Trail & Hurstbourne Parkway
Louisville, Kentucky
Greenbaum Project Number 22-024 G**

Dear Mr. Orthober:

Today we excavated the potential karst features identified in our report of March 14th, 2022. During excavation we discovered that these openings were the result of a burrowing animal. There is no evidence of karst development on this property.

If you have any questions regarding this letter, please call.

Sincerely,

GREENBAUM ASSOCIATES, INC.

Sandor R. Greenbaum, P. E.
Principal Engineer
