Certification Statement: A certification statement **must be submitted** with any application in which the owner(s) of the subject property is (are) a limited liability company, corporation, partnership, association, trustee, etc., or if someone other than the owner(s) of record sign(s) the application.

I, Tom Million, in my capacity as President, hereby
representative/authorized agent/other

certify that Brookridge Village Condo Association is (are) the owner(s) of the property which
name of LLC / corporation / partnership / association / etc.

is the subject of this application and that I am authorized to sign this application on behalf of the owner(s).

Signature: _____ Date: _____

I understand that knowingly providing false information on this application may result in any action taken hereon being declared null and void. I further understand that pursuant to KRS 523.010, et seq. knowingly making a material false statement, or otherwise providing false information with the intent to mislead a public servant in the performance of his/her duty is punishable as a Class B misdemeanor.

Variance Justification:

In order to justify approval of any variance, the Board of Zoning Adjustment considers the following criteria. Please answer all of the following items. Use additional sheets if needed. A response of yes, no, or N/A is not acceptable.

1. Explain how the variance will not adversely affect the public health, safety or welfare.

Since the buildings on either side of this proposal both obtained a variance to exceed the maximum 15' front setback the variance will allow a similar setback and will not adversely affect the public health, safety or welfare.

2. Explain how the variance will not alter the essential character of the general vicinity.

Since the existing adjacent uses are also further setback than the 15' maximum allowed in this form district, a similar deviation for this development will conform to the existing pattern and will not alter the essential character of the immediate or general vicinity.

3. Explain how the variance will not cause a hazard or a nuisance to the public.

Since the use proposed is a hotel and a drop off/loading area in front of the building is a standard and essential feature for this use and it results in the building being further setback from the road, rather than create a hazard, it allows safe and convenient access for its guests and is not a nuisance.

4. Explain how the variance will not allow an unreasonable circumvention of the requirements of the zoning regulations.

Since a variance was previously approved for this site and for the existing adjacent structures; and since the design of the building to provide safe and convenient access for its guests results in the need for the variance, the request will not allow an unreasonable circumvention of the requirements.

Additional consideration:

1. Explain how the variance arises from special circumstances, which do not generally apply to land in the general vicinity (please specify/identify).

The proposed use and the access required to allow safe and convenient access for guests staying at this hotel is a special circumstance which does not generally apply to other uses to the same extent.

2. Explain how the strict application of the provisions of the regulation would deprive the applicant of the reasonable use of the land or would create unnecessary hardship.

Since the front loading area and circulation is a standard design necessary for guest access, since the narrowness of the lot and there not being the ability to rotate the building or provide access on the side, the strict application of the regulation would deprive the applicant the reasonable use of the land

3. Are the circumstances the result of actions of the applicant taken subsequent to the adoption of the regulation from which relief is sought?

It is standard design that guest access, including a covered drop off area, is provided at the front of the hotel building and additional vehicular circulation required in front of this. This design is not a circumstance that is the result of actions of the applicant taken subsequent to regulation adoption.
