Hello

This is Big Run Creek now. You can see the indentation of how high the water was by both creek bank weeds and how they are pushed down to the ground by the current.

The west ditch drain opening is still half underwater .

Hello

This is Big Run Creek. You can see high the water mark was the night of September 3,2022.
If there was a retention pond that the prospered Apartments Complex, would release their run off, the fly away trash would polute the Creek. This Creek empties into the Ohio River. It would ruin the ecosystem here as well. There are White Ergets, Owls, Herons , Red tailed Hawks, Cooper Hawks, Mallards, Common Grackels (which is on the Nearly Threaten Speicies list) call home.
This has been documented by me for Ebird.

This water is still draining into Big Run Creek.

Cardinal oaks get the two schools , Doss high school and Trumelle elementary school run off. The proposed store with water basins would make it worst as the basin water has to go somewhere after it rains.

This drain opening is still draining since Sunday this amount of run off.
It shows how much water that that still needs to drain out from the ditch that includes Two JC ps schools. Our drain also takes in the two school ware run off.

A propose store with two drain ponds would flood out the ditch and Coco as the water has to go somewhere after it rains.
