There will be an enhanced video/security system to manager tenant safety and access with proven bidirectional audio/video technologies. There will be fire extinguishers in the common areas and peep holes in exterior doors of the units. Units will include dishwashers and garbage disposals. The innovative components of the development involve smart meters and thermostats – residents can monitor energy usage with their smart phones/tablets and remotely adjust their usage in real-time.

The exterior design utilizes materials found on the church campus and within the surrounding neighborhood. The scale of the Broadway elevation steps down to address the adjacent historic mansion with an outdoor terrace and public spaces at ground level.
