No changes in the exterior appearance of the residence which decrease compatibility with the area or the form district are proposed. The proposal advances the equitable distribution of community services and promotes neighborhoods that have access to the resources necessary to maintain health and well-being, including access to child care.

2. Is the proposal compatible with surrounding land uses and the general character of the area including factors such as height, bulk, scale, intensity, traffic, noise, odor, drainage, dust, lighting and appearance?

STAFF: The proposal is compatible with the area and form district as no changes are proposed to the residence which changes the exterior appearance.

3. Are necessary on-site and off-site public facilities such as transportation, sanitation, water, sewer, drainage, emergency services, education and recreation adequate to serve the proposed use?

STAFF: Necessary public facilities to accommodate the proposed child care center are available, including transportation, sanitation, water, sewer, drainage, emergency services, education and recreation.
