

Louisville Metro Council City Agency Request

- ☐ Neighborhood Development Fund (NDF)
☒ Capital Infrastructure Fund (CIF)
☐ Municipal Aid Program (MAP)

Primary Sponsor: CM David Yates

Amount: \$7,978.67

Date: 2/20/2015

Description of program/project including public purpose, additional funding sources, location of project/program and any external grantee(s):

Various improvements to TARC bus stops in District 25 including: adding shelters & trash receptacles as well as extending a sidewalk at Valley Station Road to improve Valley Station High School Students safety & access to TARC location. This includes an ADA ramp at the location.

City Agency: Public Works

Contact Person: Mojgan Taghizadeh

Agency Phone: 502-574-3873

I have reviewed this request for an expenditure of city tax dollars, and have determined the funds will be used for a public purpose.

Brian,
Public Works would accept the funding to install trash receptacles along Dixie Highway in District 25 (TARC Bus Stop Improvements). Please let me know if you have any questions. Thanks

Mojgan,

I am hoping to work with Mr. Mark Adams to install trash receptacles along Dixie Highway in District 25. Mr. Adams has provided me with your contact to receive funding on behalf of Public Works. I was hoping to confirm that Public Works would accept the funding for this project and be able to use you as our contact for this appropriation.

Thank you for your help,

Brian Boles

It is perfect for CIF project. The funding would go to Public Works & Assets on an interagency request form and PW&A would provide the funding to TARC under an agreement we do all the time for this type shared project. One of the engineers would be your contact person on the request form, not Mark Adams...

Beth,

Councilman Yates hopes to address a few TARC stop locations on Dixie Highway and Mr. Mark Adams has agreed and sent the attached estimate. I wished to ask you if this would constitute a City Agency Request CIF showing that TARC is willing to accept the funds to ensure these projects are funded or is this a different type of CIF?

Brian:

I took that out because I was going to include that in the Outfront Media shelter order, if approved. I have 1 shelter that we would provide @ Kroger and 1 shelter that Outfront Media would provide @ Sun Tan City, our shelter provider.

Are there any other questions?

Hi Brian:

I was glad to see your response. I agree, we could go ahead and estimate the expenditures and proceed with contacting the businesses to see if they would agree to empty the trash receptacles.

Enclosed is an updated estimate based on the numbers we discussed. The 20% match (CIF or NDF) would need council approval and these funds would be coordinated by Mojgan.

Please let me know if you have any questions or if you need assistance contacting the businesses.

Thanks,
Mark

Mark,

Sorry for not being able to call you back earlier today. Our office has been very busy with all of the snow problems. I have not been able to touch base as of yet with the managers of the places I am hoping that will agree to empty the Trash Receptacles but will be in touch very soon.

Last time we spoke you mentioned needing a number of the trash cans, I do believe the total, not counting the Shelter and the trash can at Sun Tan City and the Trash can at Kroger will be: 5 trash cans and 1 Shelter (Kroger).

Please let me know if this is satisfactory from your end.

Thank you,

Brian Boles

Subject: Trash cans

The bus stops from Dixie Manor to valley Station have NO trash cans!!! There is litter everywhere!!!!
Who is responsible for cleaning this up??
I would like an answer please.....
I am sure it is the same all over Louisville, but these are in my area.

Brian:

These are all good locations and I think the key issue is having a company empty the trash receptacles on a weekly basis. When TARC / D25 / D14 installed the benches on Dixie, the council representatives contacted the businesses and ask if they would empty the trash receptacles. They did not receive favorable responses, so the benches were installed without trash receptacles.

The concrete pads along Dixie Highway were installed to accommodate both benches and trash receptacles. I do think you have a good approach, hopefully you can work out an agreement with a solid waste company.

Thanks,
Mark

To: Adams, Mark
Cc: Bowman, Michael
Subject: RE: Bus Stop and Sidewalk Improvements

Mark,

I have added Mr. Michael Bowman of Councilwoman Cindi Fowler's office to this email to potentially discuss whether they are interested in addressing any of the TARC locations in D-14 at this same time.

I have spoken with Mr. Bryan Slade with EcoTech and he has explained that they will be unable to pick up any of the trash receptacles along Dixie for D-25 & D-14. Liz Kennedy with Councilman Blackwell's office explained she has been working with TARC to address locations along the Greenbelt Highway. Could you please pass along an example of your Memorandum of Agreement for specific businesses to agree to empty the Trash at neighboring TARC stops?

I am currently reviewing the following locations along D-25's Dixie Highway Locations:

- 1) Shelter at Kroger Location
- 2) Trash Can along Meijer
- 3) Trash Can along Tumbleweed at the Southwest Regional Library location
- 4) Trash Can along the PRP Plaza
- 5) Trash Can along Goo-Goo Car Wash
- 6) Trash Can along Frisch's at St. Andrew's Church Road

From my research it appears to me that the following D-14's Dixie Highway Locations:

- 1) Trash Can absolutely necessary at the Dairy Queen
- 2) Trash Can absolutely necessary at the Valley High School
- 3) Trash Can needed at the Rally's
- 4) Trash Can could be used at Chillers
- 5) Trash Can could be used at Thornton's
- 6) Trash Can could be used at McDonalds (Although they have some in their parking lot)

I ask that Councilwoman Fowler and Mr. Michael Bowman review these locations when possible and make their assessments.

I have also spoken with Councilman Yates and he does desire the square cans that say "Southwest Louisville" as this spreads community pride. Councilman Yates was explained that Councilman Blackwell keeps a spare trash can for these square receptacles in case of them being stolen, broken, etc. and I believe Councilman Yates would be interested in

doing the same to ensure a replacement is available and funding for a replacement of the replacement will take place allowing a backup at all times.

Please share your thoughts. I do not wish to tread on District 14's own opinions but only wanted to ensure they were in this discussion should they wish to proceed along with our office.

Thank you,

Brian Boles

Subject: RE: Bus Stop and Sidewalk Improvements

Brian:

Sun Tan City owners are reconsidering the bus shelter easement. The sidewalk is within the right-of-way and management was glad to hear that was happening. The sidewalk is just from the Valley Station to the bus stop. I'll send you some pictures of the area.

Please let me know which additional stops you would like improved and I'll update the cost estimate.

Thanks,

Mark

Subject: RE: Bus Stop Improvements

Mark,

I have identified some locations along Dixie Highway on both D-25 and D-14 locations and sent them for review to CW Cindi Fowler's office, I am also requesting of EcoTech if they will be willing to enter into a partnership as they have with D-12 for the rest the specific locations that we are hoping to install Trash Receptacles.

In one of your previous emails it appeared that Sun Tan City's owners were not interested in allowing a sidewalk be installed along their right of way, has this changed? I noticed it was still a part of the estimate you provided to our

office. I was also hoping to clarify where that sidewalk would start and end. I was not certain if you meant to take the sidewalk along Dixie to Valley Station Road or stretch it all the way down Valley Station Road as well.

Any clarification is helpful.

Thank you,

Brian Boles

Subject: RE: Bus Stop Improvements

Mark,

I have been working to identify all of the TARC stops along Dixie Highway that Councilman Yates would like to further invest in. I have also asked Councilwoman Fowler's Office if she would also wish to make some necessary improvements to some TARC stops along Dixie Highway. I had planned to drive the stretch of Dixie tomorrow and make note of each stop. If both of our Council Offices are able to identify specific locations and work to identify necessary improvements is TARC willing and able to make the improvement as we address the issues at Sun Tan City, Valley Station Road, Kroger, etc.? What is the time table for these improvements? When would we expect to see work started?

Thank you,
