PLANNING &
DESIGN SERVICES

By copy of this information – it is to be included with the sign waiver packets for the above site. Please refer to the logic map to reference distance from existing free standing sign to surrounding properties that are zoned residential.

1. From 4714 E Pages lane to the location of the free standing sign is 156.2' but his property is residential for a non-residential use as it is Hillsdale Baptist Church – so will not be included.
2. From 8616 Standing Oak Dr to location of free standing sign is 255'
3. From 4933 W Pages lane to the freestanding sign is 194.9'
4. From 4934 W Pages Lane to freestanding sign is 218.4'
5. From 4935 W pages Lane to the freestanding sign is 263' but the sign will not be visible from this address as the new building addition will block the view.

Also, we will apply for the sign permits once the sign waiver is approved.

Sign does have dimming capabilities and messages are to remain constant for 20 seconds – no flashing blinking, scrolling, etc.

Sign is allowed to be 100 sq. ft. @ 24' overall height – with the LED not to exceed 60% of the 100 sq. ft. – which would be 60 sq. ft. This sign is 2'9" x 7'10" which is 21.5 sq. ft.

I am mailing (6) copies of the attached today.
