#### Project Description Cont'd:

The Architect, at various stages, would like to consult with the NULU Streetscape team to ensure the Market St site, Nanny Goat Strut, and the Jefferson St site will be congruent with the overall plans for the 700 Block. As you are likely aware, the project design is constantly in flux due to coordination with the Distilling Process Engineers and other consultants. The building locations and footprints are solid but there may be minor changes and modifications to other aspects. Instead of delaying the NULU review process for these minor changes, we would like to have the opportunity to update the review staff/committee when these changes may occur. The following is a list of possible items we foresee changes to:

- Manufacturing Atrium Façade Material, we are in the process of developing a system for shading the glazed manufacturing space.
- Signage display from Market St (façade)
- Shape of Manufacturing Atrium, to accommodate distilling equipment
- Nanny Goat Strut, consult with NULU Streetscape team
