## Case Summary / Background

- The applicant proposes a new 330 sq. ft. bedroom addition onto the principle structure, and a new 541 sq. ft. garage.
- The addition onto the principle structure is proposed to encroach 1.5 ft. into the required side yard in order to align with an existing stair.
- The addition and the garage together reduce the private yard area below the 30% required by the Land Development Code for lots over 6,000 sq. ft. in area. The garage is proposed to be built significantly forward of the rear alley in order to preserve a large existing tree.
