Certification Statement: A certification statement **must be submitted** with any application in which the owner(s) of the subject property is (are) a limited liability company, corporation, partnership, association, trustee, etc., or if someone other than the owner(s) of record sign(s) the application.

I, Walton Jones III, in my capacity as owner, hereby
representative/authorized agent/other

certify that _____ is (are) the owner(s) of the property which
name of LLC / corporation / partnership / association / etc.

is the subject of this application and that I am authorized to sign this application on behalf of the owner(s).

Signature: _____ Date: _____

I understand that knowingly providing false information on this application may result in any action taken hereon being declared null and void. I further understand that pursuant to KRS 523.010, et seq. knowingly making a material false statement, or otherwise providing false information with the intent to mislead a public servant in the performance of his/her duty is punishable as a Class B misdemeanor.

Please submit the completed application along with the following items:

Project information

- ☒ Land Development Report;
- ☒ Current photographs showing building front, specific project area, and surrounding buildings
- ☒ Pictures, samples, brochures, or other technical data describing materials, such as windows, doors, roofing, fencing, etc. to be used in the renovation or replacement - *Engineer report*
- ☒ One map of the project area and surrounding properties (may be obtained from <http://www.lojic.org/> using the *LOJIC Online Map*)

Site plan (see site plan example on next page) — *NA*

- ☐ Two sets of site plans drawn to scale with dimensions, as applies to the project, indicating property lines, structures, landscaping, fencing, and parking
- ☐ Two copies of floor plans drawn to scale with dimensions and each room labeled
- ☐ Two copies of elevation drawings (a drawing showing exterior walls) drawn to scale with dimensions. For fencing, only photos/drawings of the proposed fence are required.

Committee Review Only

Committee reviews may be required due to the complexity of the case. The necessity of these items will be determined by staff upon review. Projects requiring committee level review include construction of new buildings, demolition, and projects that vary widely from design guidelines.

- ☐ Two sets of 11"x17" format site plans drawn to scale with dimensions
- ☐ Two sets of 11"x17" elevation drawings to scale with dimensions
- ☐ Two sets of 11"x17" landscaping drawings to scale with dimensions
- ☐ One set of mailing label sheets for: 1st tier Adjoining Property Owners (APOs), owners, applicants, contacts, and Case Manager. Applicant is responsible for mailing.
- ☐ One copy of the mailing label sheets

Walton Jones
1730 Frankfort Avenue
Louisville, KY 40206

Subject: 1726-1728 Frankfort Avenue
Louisville, KY 40206

The inspection performed at the subject property is visual at the time of the inspection and does not include any invasive investigation unless noted below. Soil underlying stability and bearing pressure determination is not part of this report. This report does not provide or imply any warranty or guarantee. The inspection does not include any design information or design evaluation unless noted below.

The subject building is a single-story wood framed structure which appears to originally have been a duplex. The structure appears to be over 100 years old and is founded on a brick wall crawl space foundation with little if any clearance to the joist framing from the soil. The structure has been modified over the years and most of the interior of the structure is rough framing only. The perimeter and interior were observed to evaluate the current structural condition and the following items are noted:

RECEIVED
FEB 09 2018
PLANNING &
DESIGN SERVICES

1. The structure is on a drainage path from the rear yard which causes water to drain under and alongside the foundation of the structure. The drainage has caused the

foundation to deteriorate over time by settling as much as 6 inches at the left side and less at the right. The mortar is deteriorated, and the bricks are loose and have fallen.

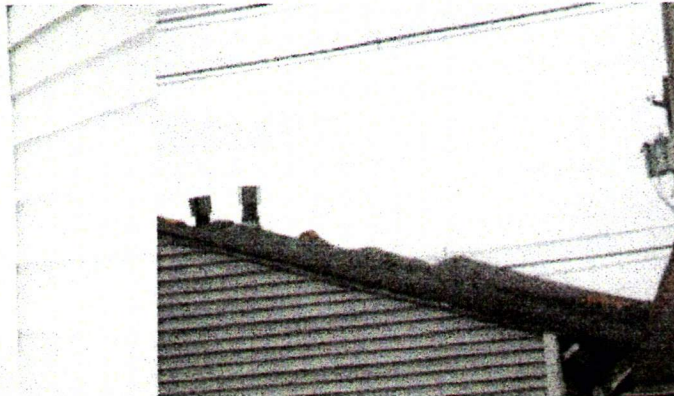

2. There is rot at the sill and joist bearing from the wick action of the brick foundation and the high moisture content of the soil below from the drainage from the rear yard.

RECEIVED
FEB 09 2018
PLANNING &
DESIGN SERVICES

3. The foundation settlement and rotation has caused the frame to displace both vertically and laterally which has affected the walls studs, ceiling joist and rafter bearing. Significant loss of bearing has occurred at the upper wall connections which deformed the structure.

4. The modification of the frame at the front left has caused the lateral tie at the ceiling joist/rafter connections to be broken causing the walls to laterally displace and the rafters to displace vertically and laterally.

5. There is rot caused by leakage of the roof which was caused by the lateral and vertical displacement at the wall connection. The roll back at the edges along the shingle edges allowed water into the wall since there is no extend soffit on the building. The separation at the outer edge has caused the gutters to be displaced also by bending which caused water to miss the inside edge of the gutters. Leakage from the roof has contributed to the deterioration of the structure at the perimeter walls.

Conclusions:

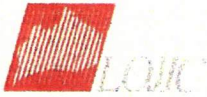

The structure has a deteriorated foundation which is considered to be unstable at the time of the inspection and is continually being deteriorated by the drainage from the rear. The frame has sustained lateral and vertical displacements as well as rot which has affected bearing for the roof structure and caused sloping floors. The structure is considered to be unrepairable in its current condition. Due to the extensive damage from years of surface drainage to the foundation and frame of the structure it is suggested to demolish the building.

If there are any questions or concerns about the observations and or opinions stated in this letter, please inquire.

Sincerely,

Joseph Cattin, P.E.
