CLEANING AND ODOR CONTROL

Indoor

Every occupied canine and feline room is cleaned daily. Solid waste is picked up using a scooper (not sprayed down the drain) and disposed of in trash bags. The tightly tied trash bags are taken out to the dumpster in the corner of the parking lot every night. All trash for the facility is picked up by a regular trash service provider. Surfaces, including the floor, are sprayed daily with a disinfectant foam called Envirocide, then scrubbed and rinsed into trench drains with water. Rooms are then squeegeed dry. In addition to this daily cleaning routine, the indoor facilities are spot cleaned on an ongoing basis as needed, using the same approach outlined above.

Outdoor

While walking the guests all yards are cleared of feces every 2-3 dogs. Once all walking is done the remaining feces are removed from all yards. In the same manner as indoor, solid waste is picked up using a scooper (not sprayed down the drain) and disposed of in trash bags. All concrete yards are sprayed using a diluted bleach-filled foam gun, then rinsed with water to remove any remaining feces and odor. K-9 grass yards are also scooped and rinsed via the same process as the concrete yards. This process is done after both morning and evening potty walks.

Cleaners and Solvents

Envirusol - Disinfectant/Sanitizer; Cleaner (2 oz per gallon)

- Daily disinfectant used for fully disinfecting and spot cleaning all suites and townhouses
- Leave Envirusol on surface for 10 minutes to fully disinfect
- Used in scooper and mop buckets; changed daily
- Applied with Hydrofoamer that provides accurate dilution ratio
- Controls odor in kennel

Clorox Bleach - Disinfectant/Sanitizer; Cleaner (4 oz per gallon)

- Used twice daily as a disinfect for outdoor play yards
- Leave Clorox Bleach on surface for 10 minutes to fully disinfect
- Used in mop buckets for cleaning lobby
- Disinfects to kill 99.9% of germs and bacteria

Turf Kleanz - Bio-enzymatic Cleaner and Odor Control Agent for outdoor areas (4-8oz per gallon)

- Used weekly to degrade odor producing organic matter
- Applied to synthetic turf in outdoor play yards
- Liquefies animal waste
- Applied with Hydrofoamer that provides accurate dilution ratio
- Controls odor in playyards
- This product does not require rinsing once applied
